## "WHAT EXACTLY IS A SMART ASSISTANT?"

If you have ever used Siri on your iPhone, Cortana for Windows or Google Assistant on your Android device. Then you have already interacted with a smart assistant. If you have not, think of these devices as an unpaid personal assistant that does all the mundane tasks around your home, from creating shopping lists through to turning on your TV to your favourite station.

## "WHY DO I NEED SMART DEVICES?"

Voice assistants can either improve your life simply, helping you create lists, setting alarms, reading out recipes or playing your favourite music.

They also have the ability to revolutionise the way you interact with your home, streaming movies, turning on lights, music, aircon and blinds either automatically or with a simple voice command.

Contact us and find out how we can help you.
