

Final Brief:

Hi Jannatec

We have selected the most recent version, with the most recent orange (F37822).

We are almost ready to approve payment, we just need a couple different versions of this logo, in various different file types that I will detail below.

Versions:

Version 1: Regular Logo

- We need the logo that is already done (seen above), on a transparent background.

Version 2: Logo all white

- We need the logo in all white on a transparent background

Version 3: Logo all black

- We need the logo in all black on a transparent background

Version 4:

- We need a version where everything that is currently orange is in white, the navy can stay the same. (With a transparent background)

Version 5:

- We need a version where everything that is currently navy is all white, the orange can stay the same. (with a transparent background).

Version 6, 7 & 8:

- We need (like what you have in the above picture):
 - The regular logo on a white background
 - The white logo on an orange background
 - The white logo on the navy background

File Formats:

- We need all of the versions I have listed above in 4 file formats. All logos of each format in a separate folder
 - .png
 - .svg
 - .eps
 - **And the files you used to edit them (e.g. if in adobe illustrator we need the .ai files)**
- We also need a masterfile with all the fonts and any other relevant files.

Once this is all done we can approve payment.

Thank you Jannatec,

Regards,

Domain Estates.
