

QUALCON
SOLUTIONS

Project Delivery. Done Differently

Our Story

We are an innovative telecommunications services company. We believe technology can truly change peoples' lives, so we are working with Victoria's most respected delivery partners to complete unique projects state-wide.

We are focusing on three key areas that we hope will build our distinct brand within the Australian telecommunications industry.

INNOVATION

- ▶ We have worked with app developers to digitalise field based documentation allowing our clients access to construction data at the click of a button.
- ▶ During the build stage of a project progress can be tracked daily, ensuring reliable forecasting and accurate reporting.
- ▶ We have also utilised existing technology platforms to make chasing completion documentation a thing of the past.

COLLABORATION

- ▶ We view ourselves as an extension of our client. We believe effective collaboration is intrinsically linked to both of our successes so we are working hard to explore exciting opportunities for Qualcon Solutions and our clients to work together to develop their products and exploit operational synergies.
- ▶ Collaboration starts at the project setup stage and continues throughout the project until completion. We sit with our client, discuss project requirements and integrate our management system to meet the project-specific requirements.

INTEGRITY

- ▶ We believe having a culture that strongly promotes integrity as a must have business trait is the key to ensuring longevity in the telecommunications industry. We strive to build strong, long-lasting relationships with clients, contractors and employees.

Our services

Working with Qualcon Solutions enables a single point of contact for your entire project. We have a wide range of specialties and in-house capabilities that allows us to take on full responsibility for projects.

Working with Qualcon Solutions reduces clients' deployment costs and time to complete the project.

- ▶ *Our services include:*
- ▶ Project Management (Certified Prince2 practitioner)
- ▶ Asbestos removal
- ▶ Pit and pipe installation
- ▶ Cable hauling (Copper & Fibre)
- ▶ Fibre splicing
- ▶ Copper jointing
- ▶ Fibre integration
- ▶ Recoverable works
- ▶ Telecommunication rigging

Qualcon solutions has a diverse range of skills, experience and capabilities.

Innovation. Creating easy to manage processes.

Tailored Onboarding

When we onboard all employees and contractors we ensure they have all of the industry standard certificates.

Using the Flare HR system allows us to easily tailor our onboarding process to match the needs of our clients and because everything is done online these records can be shared at the click of a button.

In-Field data capturing

Our field crews are supplied with pre-loaded tablets that have every app the need.

The apps give them 24/7 access to our online server (google drive) allowing them to upload documentation or photos at any time. Making accessibility convenient has removed one of field based works' biggest obstacles, getting paperwork back to the office unscathed.

Quality management

Qualcon Solutions has a company Quality Management Plan.

As part of our QMP we are unique in the fact that we complete samples of quality control & inspections of installation, we ensure quality after care and we also quality control completion documents ensuring your experience is simple and problem free.

Completion documentation overhaul

Using his extensive project and completions knowledge, Joseph has created specialised forms in the fastfields app. This approach has been proven to save hours of time by cutting out the administration "middle man".

The completed forms (with accompanying photos) are uploaded to our online server direct from the field. Chasing paperwork is now a thing of the past!

Field reporting. Simplified.

We've been tirelessly to create an **easy to use** reporting system.

1 We have worked with fastfields to create simple forms that capture field data in an easy to use app. Reports are easy to obtain and can be downloaded in many popular formats.

2 Completed forms are sent from the app to our online server for storage. No need for usb sticks or scanning, simplifying reporting.

FastField
mobile forms

The image displays two mobile devices showing the FastField app interface. The tablet in the background shows the 'Pit Installation' form, and the smartphone in the foreground shows the 'Asbestos Removal Control Plan' form.

Tablet Form: Pit Installation

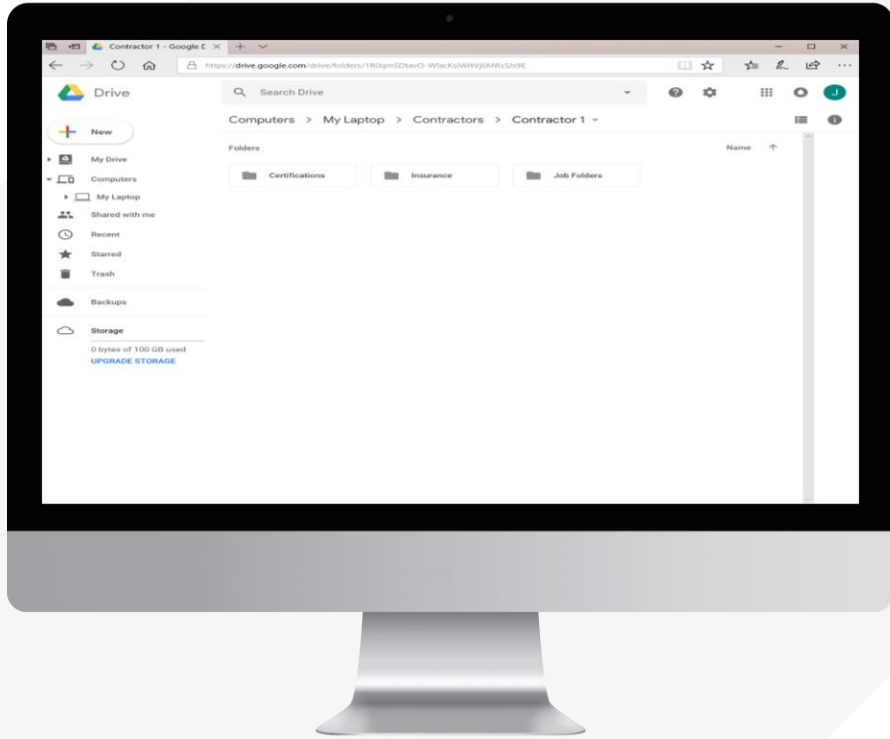

- Forms
- Pit Installation
- Submit
- Preparation
- Date: Jun 28, 2018
- Installer name: John Smith
- SAM I.D: 2DNQ-20
- Pit identification number: 13034649794
- Address: 20 Smith St, Fitzroy
- Existing Pit: A2
- ACM Removed?: N/A
- Existing Reinstatement: Grass
- Index Verify Notes

Smartphone Form: Asbestos Removal Control Plan

- Asbestos Removal Control Plan
- Submit
- Identify
- Date: Jun 28, 2018
- Company licence number: 124467789
- Company completing removal: Qualcon Solutions
- Asbestos removalists name: John Smith
- Address of removal: 52 Smith St, Fitzroy
- Client: nbn
- Pit identification number: 13008839
- Has the asbestos register been sighted?: N/A Yes No
- Type of ACM product to be removed
- Index Verify Notes

Practical Completion.

Made easy.

Our clients are our priority.
That's why we have created
an effective completions system
that can be utilised 24/7.

01.

Practical Completion made easy

Field documentation is stored in an easy to follow filing system making practical completion easy. A few clicks and you are all done!

02.

Online storage

Our completion files are available 24/7 on google's beautiful storage platform (google drive) via links provided to our clients.

We believe in **providing** the best service to our clients, past, present and future.

Here are some accolades our project manager, Joseph Noble has received from stakeholders involved with major projects he has worked on in the past.

// In my role as Team Leader of technical services at the Campaspe Shire I have worked with Joseph and his project team completing the nbn rollout in Echuca, Kyabram and Tongala. I found Joseph and his team very easy to deal with and their field crews complete their work to a very high standard. I would like to thank Joseph and his team for their efforts within the Campaspe Shire.
– NBN rollout Echuca, Moama, Kyabram, Tongala, 2016

// As well as the clients endorsement, the quality of Joseph's teams work on the recoverable works project was also acknowledged by the MTEW, who were blown away by the speed and quality of the copper cutovers. – Metro Tunnel Early Works, 2017
