

Risk Emergency Management

ASSOCIATES

Innovative.
Strategic.
Integrated.

Who we are

Risk & Emergency Management (REM) Associates deliver **innovative, strategic, integrated** and cost-effective solutions for **risk, safety, security, crisis and emergency management.**

REM Associates is a world-class organisation comprising an internationally experienced, highly skilled team who bring industry best-practice solutions exceeding regulatory compliance and client expectations, with a global network spanning Australia, South-East Asia, the Middle East, Europe and the Americas.

Consultancy

Strategic :: Crisis and Enterprise Risk Management

REM Associates has been involved in and developed Major Hazard Facility (MHF) emergency response and management plans for some of the largest energy projects in Australia.

REM Associates have undertaken comprehensive strategic reviews of emergency management, security and response capability and designed and delivered programs to enhance and raise the preparedness level required to meet existing and future regulatory requirements.

Operational :: Incident Management, Operational and Technical Risk

Our Emergency Response capability includes providing people to supplement your Emergency Management resources in an emergency event at tactical, incident or even crisis level.

REM are positioned to respond and assist in investigating incidents including workplace incident / accident investigations, HR, fraud and other internal investigations.

Our specialist Associates in this field have significant experience, are licensed and qualified and have provided these services to Regulators, Police and Coroners as well as private enterprise and Government.

REM have capacity to respond, contain and recover cyber-attacks or IT security breaches both internally or externally.

REM offers world class, leading-edge resources to provide, advise and guide clients' needs in major cyber security events.

Safety, Environmental & Compliance Advisory & Management

REM Associates is uniquely qualified, across a broad spectrum of safety and environmental services with some of the most experienced emergency and oil spill response personnel in Australia.

Our Associates have worked with State and Federal regulators including AMSA and NOPSEMA as oil spill specialists and with the shipping, ports and offshore exploration and production industries.

REM have worked with many major national and international oil and gas companies throughout the world and our Associates have been involved in numerous international responses including the Montara and Macondo (Deepwater Horizon) well blowouts.

Organisational Capability & Management Systems Services

REM's involvement in a number of high profile energy projects has led to the development of a range of integrated environmental, health, safety, security, and social performance Management Systems for offshore and onshore installations aligned to environmental, safety and oil spill response legislative frameworks.

REM have consistently guided organisations in their development of fit for purpose, effective Management Systems that comply with International Management Standards.

REM Associates have experience with operations in the North Sea, Asia-Pacific, Middle East, Africa and Australia in delivering turn-key systems for the safe operation of numerous International facilities.

With a strong belief in simple, practical and functional operational systems, practices and procedures, we bring real-time field and facility experience to the development, review and execution of these projects.

Our people are familiar with the latest standards and practices across the diversity of clients and industries serviced.

Training, Drills & Exercises

REM Associates offers a range of training based on extensive practical and real-time experience and International Standards.

We believe in assisting companies to create a training framework specifically tailored to their organisational needs. This in turn enables them to develop a bespoke internal skillset suitable to their own equipment and processes and to their facility-specific requirements.

REM offer a suite of training courses from incident command and crisis management to environmental awareness and deliver targeted drills and exercises linked directly to the training.

REM Associates have designed and delivered complex, multi-disciplinary drills and major International exercises for over 30 organisations worldwide and across most industry sectors including Governments and Regulatory bodies.

REM-designed exercises and drills tailored specifically to the organisation's risks and business needs.
