

Logo	Element in this logo I like
	<p>I like the arrows that show the cycle is continuous. However, the way the arrows are done is too dark, heavy and common.</p>
	<p>I really like the clever way the two bs are done and connected with the #2</p>
	<p>The cleanness of this logo speaks to me. I also like the wording going through the center of this circle.</p>

I like the backwards B and the regular B. Perhaps with a Roman numeral 2 (II) instead of the regular 2 since this one has been done a lot.

I like the cleanness of this circle.

Another example of the backwards and forwards B I like.

Another example of the circle with something inside and wording below.

I like the rustic look of this circle. Perhaps with a clean font inside. Would this kind of circle work on engraving?
