

## **Capabilities Statement**

### **What Syscontech Qatar Do?**

Syscontech Qatar is a Systems Consulting, Project Management, Construction Services firm, based in Bangkok, Thailand ready to expand in the emerging market of Qatar. Syscontech Qatar's core business is providing specialized technical consulting and contracting services to targeted sectors. Where Systems, Technology, IT and Construction require alignment from inception to completion. From conceptual design to implementation to integration, our focus is on systems.

In today's environment, infrastructure projects require specialized and integrated Information, Communication and Technology (ICT) systems to support the operations and business goals. The complexity of the integration of these specialized systems requires extensive knowledge and a dynamic team familiar with all components of the systems and are able to incorporate the specialized systems into the overall construction process.

Our end-user focused, solutions-based approach makes us different from other systems integrators in the region. We bring subject matter experts with vast systems implementation & integration expertise, with MEP specialists, and Construction experts and align them with customer and stakeholder requirements to provide the whole solution from end to end within the construction contracting environment. Currently there is very few competitors that can provide the depth of experience and expertise in a flexible business unit that can adapt quickly to the changes in technologies and customer needs. No other consulting systems integrator indigenous to the Middle East can demonstrate the same breadth or depth of experience or such a level of quality or diligence.

### **Where Syscontech Qatar Came From**

Prior to a company merger in 2012, Syscontech was as a division of an American Electrical Contractor that had been formed to do consulting services for special systems contracting to other companies in America and Asia

In 2012 Syscontech and UPS Engineering of Thailand merged to form Syscontech Qatar. Our current work in Qatar with one of the largest Engineering Procurement and Construction companies is when and where we immediately recognized the need for our services and over the last year we have been planning the expansion to Doha.

### **What Now For Syscontech Qatar?**

Syscontech Qatar is in a unique position to provide specialized services in Qatar and the Middle East and has already established a team to immediately capitalize on opportunities and position ourselves to take advantage of current void in the sectors and capture market share in this specialized consulting niche and in those markets we want to leverage our current relationships throughout Doha and the Middle

east with our unique expertise and provide value add to not only our clients but to our affiliate and partner companies.

**We now focus on opportunities in the following sectors:**

- Airports, ports and large scale logistics facilities
- Energy, Oil & Gas and Utilities
- Rail and Light rail projects
- Civic Infrastructure
- Stadiums, Universities and Campus
- Government and Authorities
- Special Projects

**Which Services Do Syscontech Qatar Provide?**

Syscontech Qatar is able to provide a tailored services to end users, their preferred contractors and our partner affiliates that can include either a selected mix of specialist elements or a complete end-to-end solution within the parameters of a project schedule.

We are a specialist Information Communications and Technology and Special Systems solutions provider, not a general ELV contractor. We demonstrate unrivalled expertise in the areas of

- **Consultancy and professional services**
- **Detailed design of solutions or subsystems**
- **Construction & project management services**
- **Operations & Maintenance**
- **Systems installation**
- **Systems Integration**

**World Class Service & Support**

Syscontech Qatar is committed to becoming the recognized leading Support Provider in the Middle East Security Market. We are achieving this by bringing together a multinational team of specialists with experience in USA, Europe, Asia and the Middle East, we have built a world class team through whom we can deliver industry best-practice to our clients.

Our tiered Support plans provide clients with the ability to choose the best mix of preventative maintenance and emergency response, with the option for fully comprehensive multiyear extended warranty on all equipment.

**Where Do We Operate?**

From our bases in Bangkok and Doha, we currently focus our operations in Thailand and Qatar and our focus will remain in these areas. However, our rapid deployment methodology means we can go anywhere and always be assured of consistent success.

**We Focus on Delivery**

By bringing international expertise to every aspect of what we do, we have built a capability to reliably deliver on our clients requirements, however ambitious they might be.

We are able to help our partners extend their capabilities without having to build their own internal skillset, and by providing a sub-contracted specialist service wherever it is needed.

## **We Believe In What We Do**

Our company is built on a set of core values that influence everything we do and every decision we make. These core values help ensure we provide a consistent quality of service to every client in every sector.

- ✓ We do what we say we're going to do
- ✓ We anticipate the complaint
- ✓ We are pro active
- ✓ We are a team
- ✓ We have integrity and we are trustworthy
- ✓ We build reliable long term relationships
- ✓ Nobody in the company is too senior to ignore these core values or too junior to insist on them

We are constantly searching for ways to improve what we do and develop our organization, and as a result we are constantly looking for new talent, new technology and new partnerships.

Get in touch if you think we might have a future together.
