

Christianity is the religion of choice by the majority of human being on the earth, and there are approximately two and a half billion people who take some Christian label. Yet although it is popular for its compelling figurehead and its message of easy forgiveness and eternal life, in many ways Christianity is better understood as a successful failure.

In *Christianity: A Successful Failure*, author Tim Spiess exposes Christianity for what it is, providing a compelling and insightful analysis of why Christianity itself is a successful failure—meaning it is successful according to one lesser standard, and a failure according to another greater standard. As a contrast to Christianity's errors and failures, this exposé also offers a solution that puts forth the best worldview possible for humanity, starting with common existential issues that every human being faces.

With reason, logic, and observation, each of us can find out how many of the key, primary, and foundational beliefs and practices of Christianity not only have nothing to do with Jesus of Nazareth, but actually nullify and cancel out his most important teachings. As we therefore rise above religious concepts and movements, we can create a significant paradigm shift in our view of God and this life we are given.
