

MAG CORP

Magnetic Answers for Market-Driven Needs

Magnetic Solutions For Industry

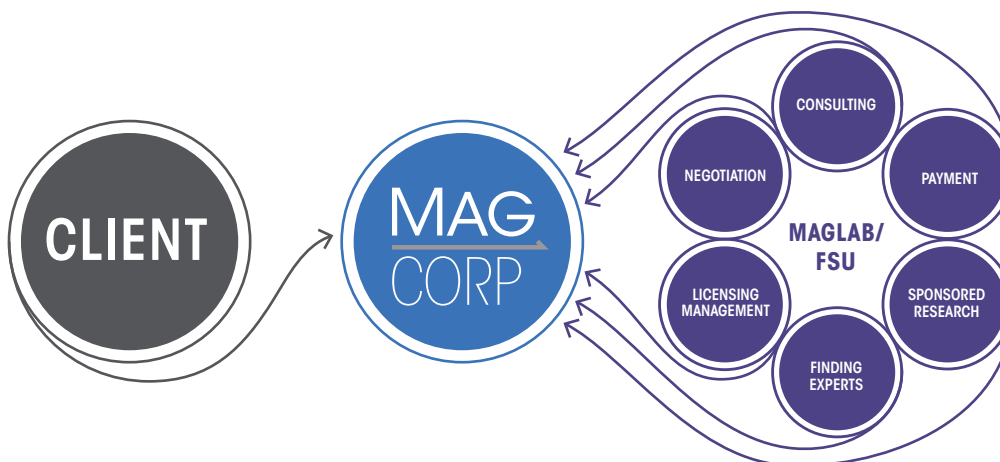

The National MagLab, headquartered at Florida State University, is the only lab of its kind in the United States and is a destination for scientists and engineers from all over the world to conduct foundational research on new materials, energy solutions and the cells that underlie life itself using powerful magnetic fields. **MagCorp** has been created as a destination for industry and defense magnet technology development, providing access to the MagLab's world-leading experts for feasibility studies, prototyping or commercial development. It is an innovation foundry where science-based solutions are applied to industrial problems at industrial speeds.

Feasibility Studies	Proof of Concept	Prototyping	Product Development
Go/No Go Assessment	Benchtop Device	Alpha Technology	Beta Technology

A Curated Client Experience

MagCorp eliminates the confusion that can come from partnering with academic institutions. We provide a path for our clients to tap into expertise at the MagLab/FSU with clarity from the start of the collaboration process.

We speak business. We speak science. We speak university.

CLIENT BENEFITS

- Lowers the risk to all parties
- Allows for "time to get to know each other"
- Increases risk and commitments as projects mature
- Swift execution of agreements and responsive to sponsor's needs
- We speak the same language
- Complete operational control & flexibility
- Platform for tech transfer of SBIR/STTR phase 3 projects
