

Application Lifecycle Management

Workflow | DevOps | Integration

Upgrade your IT with confidence, stability and ROI.

Where would you be without the ever-accelerating technology that's propelled you this far? Its potential is miraculous. Its power is undeniable. But its nature is *change*. And so is ours.

With more than 25 years as innovative leaders in software development, engineering and application lifecycle management, we thrive on growth and transformation — and on helping organizations like yours do the same.

Since 1992, Remain Software empowers clients worldwide with robust, reliable, flexible and scalable IT solutions for their evolving needs in task, workflow, end-to-end application lifecycle management and more.

Our signature solutions **TD/OMS** and **Gravity** ensure timeliness, predictability, collaboration, transparency, analysis, support and total control through it all. Our strengths and innovation expand exponentially by powerful synergy with global partner specialists. Intelligent planning and the smooth implementation, integration and deployment of world-class technologies result in significant savings of time, money and human resources as we mitigate the risk, error, downtime and frustration.

Specializing in both IBM i and multi-platform architecture, we're prepared for your next step.

Workflow

Remain focused. Save valuable time, resources and reputation. We'll streamline data, communications and collaboration capacities for highly efficient, integrated project-management workflow across all teams.

Modernization

Embrace Change. Count on our vast expertise and steadfast support for strategic modernization, application upgrades and smooth deployment of (complex) integrations.

API

Remain flexible. Soar through the ever-changing IT landscape with exceptional integration with emerging third-party technologies. Our progressive and innovative open-architecture design continuously perfects application program interface.

DevOps

Remain confident. We're your bridge for communication, collaboration and relationships between development and IT operations, so you'll maintain solid footing during development, testing and deployment in DevOps integration.

ALM

Remain in control. Harness the power of our robust, reliable application lifecycle management solutions. We'll pave the ever-emerging road ahead with stability and a solid (yet flexible) IT foundation.

Embrace Change. Remain in Control.

Some expect *status-quo*. We'll show you *exceptional*.
You'll *never look back*.

At Remain Software we invest in our customers with service, technologies and support that far surpass the status-quo. In turn, our customers *remain* invested in us.

They value the profoundly effective solutions we tailor to their critical application needs, how easily and knowledgeably their teams operate from our comprehensive training, and how streamlined and efficient every process becomes through strategic, solid and well-supported IT transformation.

"We rely on TD/OMS to implement software changes quickly and flawlessly, allowing us to adjust to the changing market – and offer excellent support to our customers. TD/OMS is a stable, well-functioning software that provides the services we need and doesn't require much attention at all."

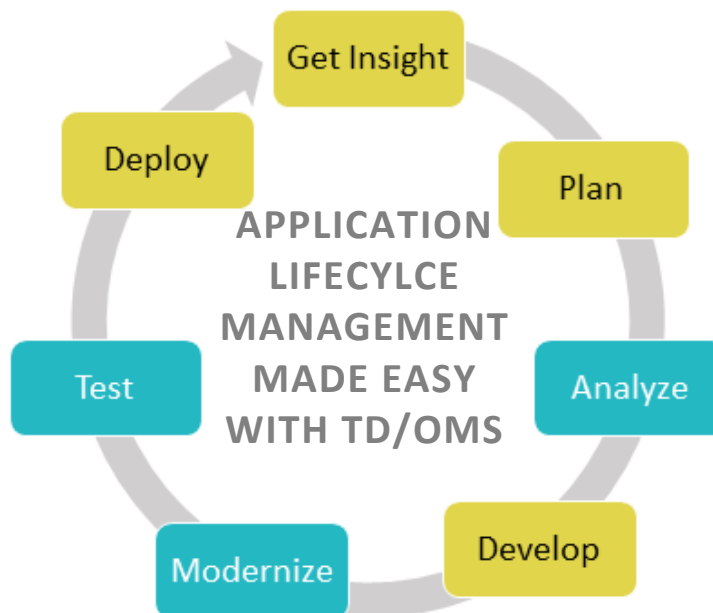

Erik Nieuwenhuis, Manager IT, EuroCCP

What's more? We develop in-house, which results in rapid adaptation to our customers' needs. In-house development lets us quickly customize code and functionality and adapt and integrate with newly emerging software and industry offerings. This keeps us in the driver's seat for continuous updates that enhance and optimize the functionality, efficiency and capabilities of our industry-leading products. We're constantly advancing, earning the trust and confidence of those we serve with excellence every day.

"We're proud of our 95% customer retention rate. And we're thrilled to witness the ongoing success of organizations large and small who came to us seeking clarity and direction, stayed with us for world-class solutions, and continue to rely on us to guide and accompany them along the exciting, ever-changing road to tomorrow."

— Marco Kok, Managing Director of Remain Software

***For the long (and the short) haul, there's only one appropriate route:
Embrace Change. Remain in Control.***
