MODERNIZE

WITH SIMPLICITY

MODERNIZE WITHOUT COMPROMISE

In today's lightning-fast digital world, it's critical for business to make their move to an agile data center where mobility and simplicity reigns supreme.

Converged Micro Data Center is now the new normal thanks to its affordability, agility, efficiency and speed. And thanks to RiverSync, business can begin their journey to the Modern mobility with the broadest All-Integrated portfolio on the market.

What does that mean for your business? Consistent, predictable, integration across your infrastructure, while dramatically reducing cost and complexity. It's time to take to leap to the Converged Data Center with RiverSync. We'll show you how.

“RiverSync mission is to ensure customers maintain a competitive edge by enabling speed in depolying technology infrastructure. literally we design our solution to be enterprise reliabilty with the simpicity of plug and play.”

*Sarin Na Wangkanai, CEO
RiverSync*

INTEGRATION OF BRILLIANCE

While the compressor is the underlying cooling mechanisms, it is RiverSync architectures and software that distinguish us from the others. No other infrastructure company offers the range of products and solutions designed to transform your business like RiverSync. Driving new levels of modular data center across our entire infrastructure portfolio, we ensure you get maximum value from your infrastructure investments.

Efficient:

- Perfectly insulated with polypropylene material, the energy required to cool down the internal IT equipment is used much more efficiently, reducing the energy loss though close enclosure containment to a minimum. This results in lower operational costs to run compare to traditional server room, as the cooling is 100% used only to the IT equipment and servers.

Density:

- Increase rack density up to 80% over traditional server room deployment, reduced space of installation.

Savings:

- Reduce costs by up to 80% over three years, including 4.8X lower infrastructure admin costs with simple deployment, integration, reduced management complexity, and less power, space, and cooling requirements.

Availability:

- Built for enterprise availability up to 99.99% with heavy industrial components to withstand non-stop mission critical operations.

Converged Infrastructure:

- Deploy full integrated and prefabricated, ready-to-go infrastructure platforms to run your business IT infrastructure.

CONVERGED MICRO DATA CENTER

Introducing the modernize way to hosted your IT infrastructure in an enclosed and integrated system that is complete with enterprise grade cooling system.
