

Project : Health insurance quote

Realization of the design of a responsive Web application allowing an individual to proceed to the pricing and online subscription of a complementary health (4 steps).

The principle of this complementary health is the modularity since the person can choose to take 5 reinforcements (general care, hospitalization, optics, dental, soft medicine) according to his needs and individually for each member of the family - therefore requires an approach individual and personalized for each member of the family (2 parents + children).

Presentation

Key Points

- Simple
- Clear
- Friendly
- Playful
- Modular

- Sponsorship area
- Subscription by electronic signature

Formats

Iphone

Ipad

Web app

Responsive

4 Steps

1

- 1) Information of the people to be insured (First name, date of birth, insurance plan)
- 2) Choice of Needs (General Care, Hospitalization, Optics, Dental, Alternative Medicine)

2

- Choosing the insurance formula preselect according to the predefined needs / part persons.
- Ability to compare and choose another formula.
- Possibility to see the details of the guarantees for each formula.

3

- 1) Summary of Selected Formulas
- 2) Ability to insert a promotional code / sponsorship
- 3) Final price with any discounts
- 4) Sending the quote by Email

4

- 1) Recovery of items (IBAN, contract number to terminate the current contract, Social Security Number, mobile phone ...) for online subscription
- 2) Electronic signature
