Care and Use of Dolls

About Us

Our online store offers weighted dolls that are used by investigators to reenact and photograph scenes of sudden, unexplained infant death.

Features:

- The six or eight pound featureless dolls are made of light-colored fabric or orange high-visibility fabric for photographic purposes.
- The orange fabric may be wiped with a germicidal solution using a damp rag.
- A permanent marker may be used to mark the front and back or add facial features as desired.
