Solid Surfaces

www.staron.com

### STARON -SOLID SURFACES

The internal composition of Staron is uniform and non-porous with luxurious soft textures. It is available in attractive natural textures of a wide range of colors and is a practical choice for kitchens, living rooms, bathrooms, and an artful addition to the living spaces. The infinite design possibilities with Staron can produce a variety of creative living spaces and cultures.

Tempest combines the elegant patterns of natural stone and the excellent durability and workability of solid surface. It enriches the space with the splendor of precious metals, and creates diamond-like transparencies that heighten the elegance.

### STARON - RADIANT QUARTZ SURFACES

Radianz™ by Samsung is a remarkable blend of nature and technology combining natural quartz with advanced polymers. The result is an extremely hard and durable surface with performance and aesthetic characteristics that is superior to that of quarried stone products. Radianz™ quartz surface is commonly used in any interior surfacing applications such as floors, walls and premium countertops for homes and businesses.

Radianz™ is comprised of more than 93 percent mined quartz crystals, one of the hardest minerals found in nature. Color controlled quartz crystals are blended together with technologically advanced polymers, resulting in a luxurious and smooth high-gloss material that does not require routine sealing.

### STARON – SOLID SURFACES

#### 1. DEPENDABLE PERFORMANCE

- Innovation meets superior standard
- Homogenous material
- Light and strong

#### 2. KEEPING THE SURFACE HYGIENIC

- Non – porous material
- Resistant to harsh chemicals
- Easy to maintain

#### 3. DIMENSIONAL FLEXIBILITY

- Thermoforming possible
- Excellent workability
- Various edge treatments
- Precise expression

#### 4. INFINITE RANGE OF COLORS

- Natural and vivid colors
- World's first "Jewel - like" Tempest material
- Collaboration

#### 5. SEAMLESS

- Seamless joint
- Color consistency

#### 6. ILLUMINATING THE ENVIRONMENT

- Brightness control
- Possibilities are endless. Form simple texts to unique shapes and curves

#### 7. EXCELLENT QUALITY CONTROL

- Long term warranty
- Green Guard certified
- Healthy building material certified
- NSF51
- ISO 14001

### STARON – RADIANT QUARTZ SURFACES

#### 1. MAINTAINS A HEALTHY ENVIRONMENT

- Non – Porous Material : Resistant to growth of mold, mildew and bacteria
- Easy to clean: separate coating or polishing is not required

#### 2. COLOR UNIFORMITY

- Strict quality control
- Infinite color options: solid and vivid color
- Gem Look Noble collections

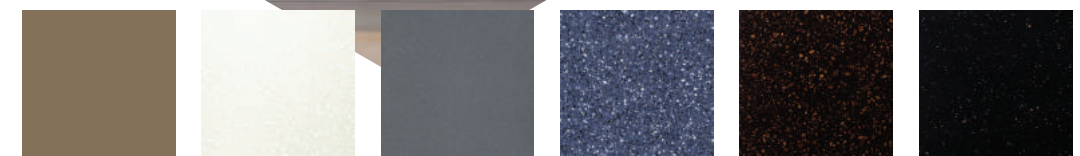

#### 3. ECO –FRIENDLY SOLUTIONS

- Green Guard certified
- LEED certified
- SCS certified
- Utilized recycled contents
- Efficient wide slabs

#### 4. HIGHLY DURABLE

- Surfaces can withstand against High temperature
- Area : Class A fire rating certified
- Scratch resistant : Mohs scale 7
- Withstands hard physical impacts
- Long term warranty

- ✓ Excellent durability
- ✓ Easy to clean
- ✓ Hygienic
- ✓ Repairable
- ✓ Versatile Material
- ✓ Loaded with color option
- ✓ Easy to integrate

BOEN is an international player in the hardwood flooring business. BOEN products are sold in more than 50 countries, on four continents, with Corporate Management based in Norway. In addition to production sites in Russia, Lithuania and Switzerland, BOEN has sales offices in Norway, Germany, Lithuania, UK and USA and a big partner network around the world.

#### BOEN HARDWARE FLOORING

BOEN's main product is engineered hardwood flooring in approx. 13 various wood types, with a choice of thicknesses to cover different needs. Today, BOEN delivers customised hardwood flooring for gluing to sub-floors, gluing or nailing in tongue and groove, self-bearing parquet boards for nailing to joists and hardwood floors in Clic or traditional tongue/groove for installing using the floating method.

The product range includes a large selection of 3-strip, plank and patterned hardwood flooring. Most of these products can be delivered finished with lacquered or oiled surfaces. BOEN can also offer tailor-made surfaces.

BOEN offers a selection of accessories and maintenance products for all floorings in their range. This products are widely available throughout the world today.

## BOEN SPORT

BOEN has manufactured sports flooring since 1960. BOEN Sport is our specialist department for the sale and development of tailor-made flooring for indoor sports facilities. Along with its patented sports floor system Boflex, BOEN Sport offers a variety of solutions for sports activities and stage floors, requiring shock-absorption qualities, whilst offering a choice of hardwood or synthetic surfaces.

BOEN Sport has been singled out as a focal area, with its own sales and service concept targeting professional sports floor companies as well as public and private installers of sports flooring.

## RANGES

## RANGES

### 1> ENGINEERED WOOD FLOORING

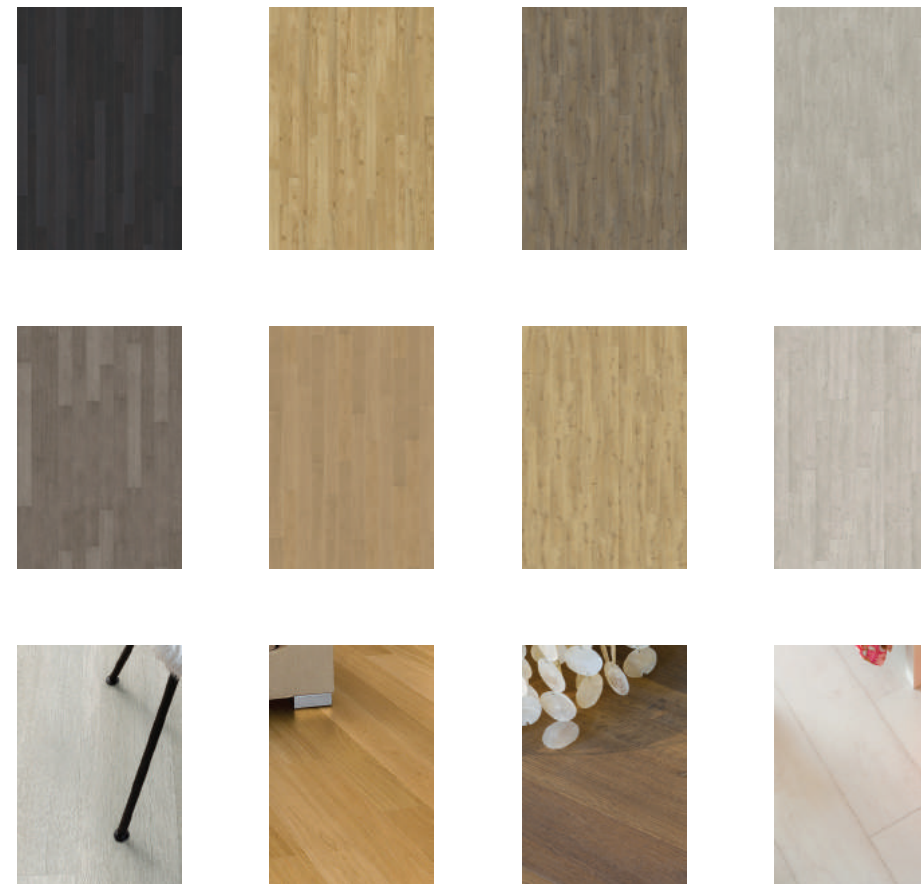

Quick-Step wood floors are engineered wood floors made up of three layers of solid wood, covered with a protective finish. A careful selection of raw materials and a tightly controlled manufacturing process guarantee optimum stability and durability.

### 2> VINYL FLOORING

Livyn luxury vinyl flooring consists of five different layers. This not only results in a waterproof floor with sound-reducing properties, it also gives your feet a very warm and soft surface to walk on. Still, vinyl floors remain exceptionally thin: perfect for renovations.

### 3> LAMINATE FLOORING

Laminate flooring is a layered floor built around a watertight, glued High Density Fibre (HDF) board. All Quick-Step laminate floors consist of four different layers

- ✓ Up to 10 times scratch resistance
- ✓ Ease of installation
- ✓ Splash warranty
- ✓ Antistatic surface
- ✓ Hygienic surface
- ✓ Light and sun Resistant

[www.kastamonuentegre.com.tr](http://www.kastamonuentegre.com.tr)

Kastamonu Entegre, who produces the raw and melamine coated particle boards, glossy panels, MDF, laminate flooring, tops, door panels and value added products for the needs of the furniture, decoration and construction sectors, has a consolidated turnover of 1.2 billion dollar and is a global power positioned as the 1st of its sector in Turkey, the 4th in Europe and the 7th in the World. Today, with its 6000 employees and with its production power, knowledge and experience, with its exports made to 100 countries from Middle America to India, it is the 1st in its sector and the 36th among the first 500 Industrial enterprises listed by the Istanbul Chamber of Industry.

Kastamonu Entegre has 18 factories at 7 countries and 12 different locations such as in Turkey, MDF and particle board at Gebze and Kastamonu, particle board at Balıkesir, Samsun and Tarsus, MDF at Adana and overseas, door panels and particle boards in Romania, kraft paper in Bosnia Herzegovina, particle boards in Bulgaria, MDF in Russia, particle boards in Italy and wood chips in U.S.A.

MDF FOR THE 21<sup>ST</sup> CENTURY**medite**

www.medite-europe.com

MEDITE is arguably Europe's most recognised brand of MDF; available in Europe since 1976 we were the pioneers in introducing MDF to European markets. That has allowed MEDITE products to now be recognised as the benchmark for quality, consistency and performance in the MDF market.

From our production and research plant in Clonmel, Ireland, **we supply a wide range of MDF products to meet the diverse needs of users, specifiers and designers across Europe and beyond.** Our extensive range includes ten different families of MDF products and many variants, with over 400 possible specifications from a production capacity of some 410,000 m<sup>3</sup>.

Through consistent commitment to research and development we have established **Medite as the leading brand in the MDF market by introducing a wide variety of quality products. Today the extensive Medite range includes MEDITE PREMIER, MEDITE TRICOYA, MEDITE TRADE, MEDITE ULTRALITE, MEDITE MR, MEDITE FR, MEDITE EXTERIOR, MEDITE ECOLOGIQUE AND MEDITE FQ.**

MEDITE Europe became part of Coillte in November 2006. It is also a major influence in timber technology around the world. After many years of working with Coillte as the main log supplier to our Clonmel plant, MEDITE Europe is proud to be part of the Coillte family.

## RANGES

### MEDITE<sup>®</sup> PREMIER FR

MEDITE PREMIER FR FLAME RETARDANT EUROCLASS C is an MDF panel developed specifically for use in situations where a EURO CLASS B or a EURO CLASS C FLAME RETARDANT MDF board is required under building regulations.

### MEDITE<sup>®</sup> MR

MEDITE MR is a moisture resistant MDF panel designed for use in humid conditions in accordance with MDF.H1 as defined in EN 622 part 5, so is ideal for applications such as kitchen and bathroom furniture, window and skirting boards and architectural mouldings.

Wood is our past, our present and our future. Located in the heart of the Charente, in the south-west of France, our corporate philosophy is based on the core values of truth, sincerity and respect. The Joubert Group has evolved over the years to become a benchmark, the leading European manufacturer of legal, certified Okoume plywood.

Today, we continue to shape the future of the plywood industry through different technical and environmental innovations.

**JOUBERT**  
PLYWOOD

**HALSPAN®**[www.halspan.com](http://www.halspan.com)

Halspan is one of the leading suppliers of quality door components in the world. Its universally respected doorsets are made under licence by customers on all five continents. A pioneer in its field, Halspan has been at the forefront of its industry in one way or another for over 20 years.

First, in the early 1990s, Halspan developed an entirely new way of constructing doors, using pre-tested fire door blanks made from 3-layer particle board. It took the industry by storm and hasn't been bettered since. Today, Halspan offers an unrivalled range of not just timber fire doors, but also fire-rated steel frames, fire glass, seals and hardware.

# LITEWOOD™

[www.litewood.com](http://www.litewood.com)

**LITEwood Door Blanks** are made of the versatile hardwood **Albasia Falcata** LITEwoodDw. They offer the properties of hardwoods and have an average low density of 320 kg/m. Thus, LITEwood Door Blanks weigh less than 28 kg!

**Platform** is a type of 3-layer plywood. It's primary usage is the center of blockboard (i.e. blockboard without the face and back). The veneer (short core) covering the lumber core is cross grain. Made from 100% Albasia wood, Platform is a replacement for MDF and particle board products.

**Blockboard** is a type of 5-layer plywood. It is comprised of a hardwood top and bottom veneer, two layers of short core, and Albasia lumber core (bare core). There are two types of standard panel sizes: 18 mm and 15 mm. This product is offered in various grades.

### Solid Timber

High strength-to-weight ratio, stability, machinability and low moisture retention/swelling are features that make solid timber the perfect medium for door blanks.

AL NOOH WOOD DESIGN deliver superior quality lumber to our valuable customers. We provide finished lumber in standard sizes, mostly for the construction industry. With widespread resources and our manufacturing capabilities, we do lay-ups, sanding, laminating and finishing using state-of-the-art equipment.

AL NOOH WOOD DESIGN specializes in kiln dried wood, lumber that has been heated in a kiln so that it has a low moisture content, when the drying process is complete, the lumber usually has a moisture content of between 6% and 8%, making it significantly dryer than green lumber or air dried lumber, this type of wood is ideal for a wide range of woodworking tasks.

# ALNOOH VENEERS

AL NOOH WOOD DESIGN offer a wide range of superior quality veneer especially in the Natural wood veneer and Reconstituted wood veneer category. We are a one stop solution for quality exotic and exclusive veneers in Bahrain. We combine years of experience with technology and resources to help our customers succeed.

Rotary - The log is rotated around its axis and peeled off like a carpet roll

Crown Cut – The flat sliced or crown cut, through the heart of the log

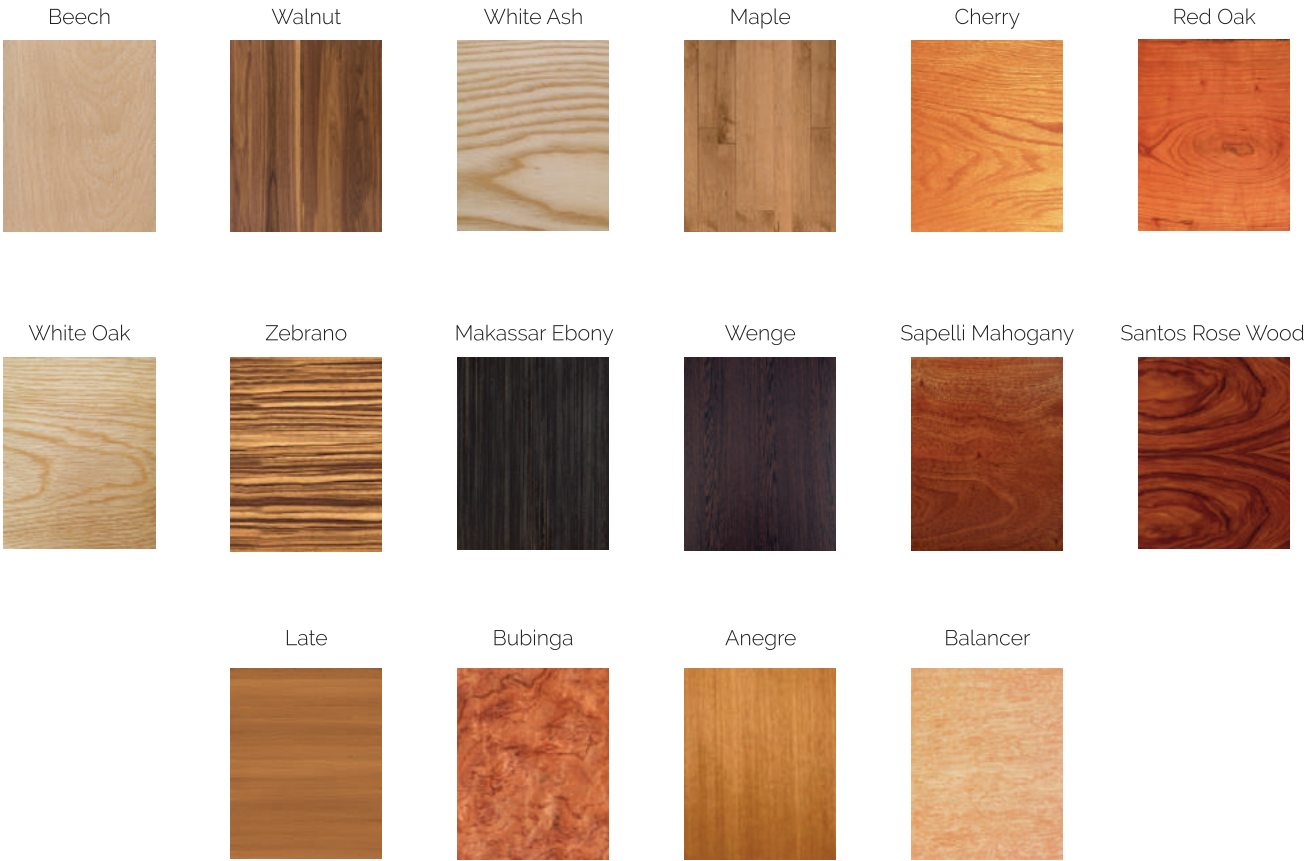

Quarter Normal Cut – Straight – grained, cut at right angles to the growth rings

Quarter Rift Cut – The log is rotated around its axis and the cut is made across the growth rings at a specific angle.

## Natural Veneer

AL NOOH Natural Veneer acts as an excellent key material for furniture, cabinets, and other applications include door skins, curved and cut-to-size applications, wall panels, counter fronts, flooring, and edge banding. We provide you with natural, eco-friendly product manufactured from FSC and SFI certified wood. It offers an enduring and timeless beauty. Variety of balancers are available.

## RANGES

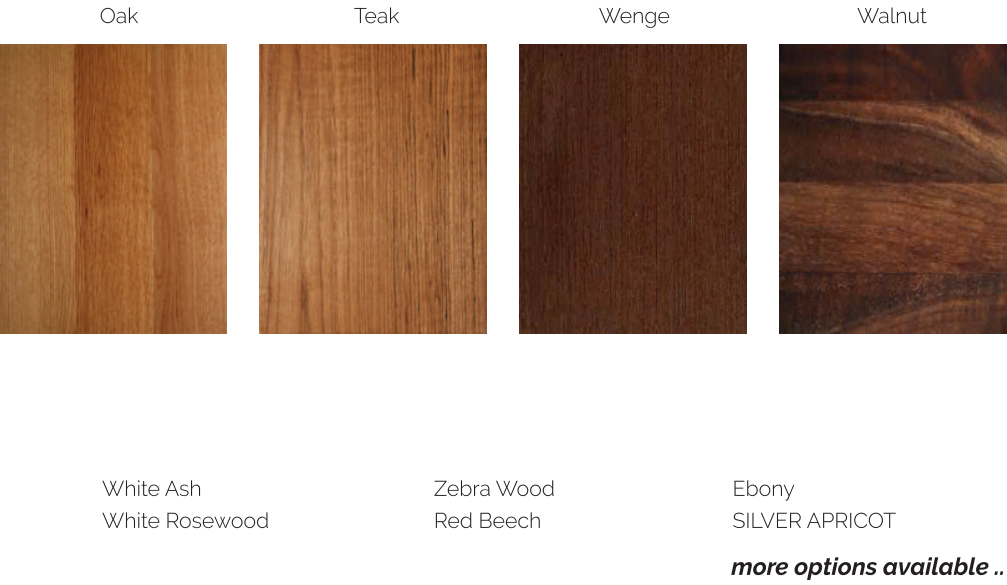

## Reconstituted Veneer

AL – NOOH Reconstituted wood veneers are defect-free and identical from one sheet to another when purchased together, making them a great option for projects where consistency is critical. We provide the best quality veneer carefully chosen from numerable selection of wood species, is made out of real species counterparts. One of the primary feature we provide is stability and sustainability, it is resistant to chances of splitting or cracking. We provide you with maximum color and grain consistency veneers. We deal in over different varieties of exclusive reconstituted veneer from different parts of the world ensuring quality and international standards.

## PRODUCT PORTFOLIO

A result of an undying passion for craft, technology and art ; Greenlam product range can work with almost any style of decor. Offering breakthrough designs and stunning textures which are incredibly gorgeous and strikingly creative. Designed to transform dull spaces to a lively paradise. Each variant of laminate is complemented by exquisite detailing and understated, to say the least.

**HD GLOSS LAMINATE**

A superior gloss laminate empowered with the best in class Scuff, Abrasion and MAR resistance to resist permanent deformation or micro scratches resulting from the application of dynamic mechanical force.

**DIGITAL LAMINATE**

Innovation and contemporary consolidated into one. Extensive variety of digital colours and patterns for you to enrich every nook and corner of your spaces. Be a trendsetter.

**UNICORE LAMINATE**

A result of an undying passion for craft, technology and art, these laminates are perfect for edging to create a uniform and seamless finish with no dark edged. Made with special decorative paper, Unicore, in solid colours, suede & gloss surfaces, it enhance the, decor aesthetically.

**DOOR SPECIAL LAMINATE**

A range so perfectly fit for doors, these laminates not only clad your doors seamlessly but also make them look beautiful. Available in a specialised 3'x7' size to cater to your every need.

**CHALK & MARKER GRADE LAMINATE**

Two premium ranges of laminates, white whereas marker board is fit for markers. Available in a variety of colours, these laminates, when wiped, turn spotless and live much longer than the traditional boards in schools and corporate houses.

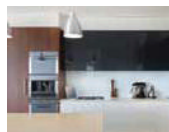

**SWITCH BOARD PANEL**

A collection of ready to use switch board panels which can be easily cut and drilled, these panels are apt for homes and offices. Manufactured under strict process control, these panels come to life by layering of phenolic resin impregnated 'A' Grade kraft paper with melamine strength and electrical properties.

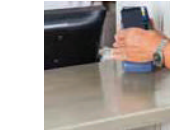

**FIRE RETARDANT LAMINATE**

Treated with imported fire retardant chemicals which help in delaying temperature rise, making it resistant to fire. Available in a variety of colours and designs, these laminates are high in aesthetic appeal and ensure secured environment.

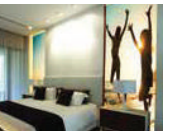

**SUPERTUFF LAMINATE**

Tough from inside. Exquisite on the outside. That are Greenlam Supertuff laminates for you. Available in 1.5mm thickness, these laminates are engineered to withstand rough usage.

**CUSTOM LAMINATE**

Now decorate the world around you with your imagination and adorn your house just the way you want with custom laminates. Bring us your own images, artwork, photographs or illustrations and we'll create laminates that are unusual and memorable.

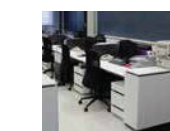

**POSTFORMING LAMINATE**

Designed exclusively to enhance the aesthetics of your interiors while preventing water seepage in crevices and moisture retention. Armed with added flexibility and malleability, the post forming laminates are ideal for application on shutters, counter tops, furniture tops etc.

**ELECTROSTATIC DISSIPATIVE LAMINATE**

When it comes to excellent dimensional stability, ESD laminates come first. Having five times more stiffness than its substitutes, the chances of dust accumulation are less on these laminates making them ideal for IT offices, call centres, laboratories, electronic industries, pharmaceutical labs, offices where electronic gadgets are regularly used.

**COUNTER TOP LAMINATE**

A perfect fit when it comes to kitchen and bathroom settings, these laminates are remarkably elegant and modern, and at the same time are resistant to stains, moisture and abrasions. Available in a wide range of sizes and colours to add to your taste of stylish interiors.

**DECOLINER LAMINATE**

Range of low maintenance liner grade laminates that add a new dimension to your craftsmanship. Make your cabinets, cupboards & wardrobes as beautiful inside as they are outside.

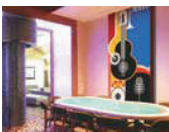

**CLADS EXTERIOR GRADE COMPACT LAMINATES**

Exterior Grade Compact Laminates with unmatched GLE technology, designed to make exteriors enthralling and gripping.

**DIGITAL COMPACT LAMINATE**

Planned by the seasoned artistic minds, these new patterns let you explore infinite possibilities and breathe new life into your spaces with sheer brilliance.

**CLADS INTERIOR GRADE COMPACT LAMINATES**

Interior Grade Compact Laminate crafted to beautify your interiors, made from solid grade high pressure Compact Laminates.

**UNICORE COMPACT LAMINATE**

Specifically crafted for interior design projects and bespoke furniture, these laminates are perfect for edging to create a uniform and seamless finish.

**COMPOSITE PANEL**

Thinner alternatives of Compact Laminates, these panels are durable and sturdy as ply boards. These are designed to be particularly resistant to degradation, scratch and stain; making them perfect for bathroom doors, workstation partitions and other self-supporting vertical applications.

## GREENLAM PARTICLE BOARDS

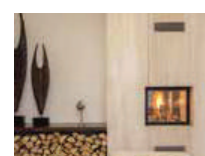

**MFC MELAMINE FACED CHIP BOARD**

Fused with excellent machinability, superior screw-holding power & smooth surface finish, these Melamine Faced Chip Boards are crafted to add perfection to the spaces. Offering a very wide range of stunning designs, they are ideal for both commercial and residential spaces.

## WOODS AND ALLIED PRODUCTS

**decowood PREMIUM VENEERS**

# MODECOR

[www.modecor.com](http://www.modecor.com)

Established in 2000 in Jubail Industrial City in Saudi Arabia and covering a surface of 70,000 square meters, Modern Decor & Wood Products Manufacturing Co. Ltd. (Modecor) plant is the first lamination manufacturing operation of its kind in the Middle East and GCC markets.

Modecor manufactures and markets Decorative Laminates, Thermo Fused Melamine Faced Panels (MDF and Chipboards), Laminated Flooring and Melamine Edge Bands. Modecor uses the latest process technology of continuous lamination used by very few multinational firms in the world. Basically we are always looking out to the horizon for opportunities in underserved markets, and our philosophy is to license the latest state of the art technology to bring better products to the market at better cost.

With the state of the art German machinery and a dedicated team of more than 150 professional engineers and technicians; Modecor plant is equipped to produce 40 million square meters of impregnated decor and kraft paper, 10 million square meters of thermo fused melamine faced panels, 5 million square meters of laminates and 1 million square meter of laminated flooring annually. Modecor products are available in a vast range of contemporary modern decors & textures.

Modecor manufactures its own resins, with its own impregnation facilities from VITS-Germany for both phenolic and melamine decor paper.

Modecor endeavors to be a premier supplier of surfacing material and always holds the highest regards for its people, community and the environment. The company operates under the ISO 9001:2008 certification indicating its commitments towards total quality and customer satisfaction.

## RANGES

### 1> MELAMINE FACED PANELS

Medium-density fiberboard (MDF) & Chipboard are engineered wood product, they are denser and uniform than conventional wood & plywood, and they are best alternative to natural wood. Melamine MDF and Melamine faced chipboards (MFC) by Modecor are available in wide range of thicknesses, sizes decors and textures and they are suitable for unlimited applications. Modecor recommends MDF for home and office furniture applications and MFC for Worktop and kitchen applications.

### 2> DECORATIVE LAMINATES

HPL is considered one of the most durable decorative surface materials and its performance properties of impact, scratch, wear and stain resistance. Postformed laminates can be easily formed to required very tight radii.

Due to its durability, HPL is a common choice for all horizontal and vertical surfaces and Modecor offering wide range of modern decors and surface finishes for different areas & application.

### 3> LAMINATE FLOORING

Laminate Flooring is a multi-layer synthetic flooring product fused together with a lamination process and its having the advantages of costing less and requiring less skill to install than alternative natural flooring and it's durable, hygienic and easy to maintain.

We enclosed our brand new developed surface MAGIC TOUCH ready to be tested by yourself.

Headed with "scrape & wipe it" this revolutionary product is showing a surface that reaches a new dimension of scratch resistance on flat surfaces combined with anti-fingerprint finish.

Take your car-keys and scrape them hard on the surface of the product until you see some stripes. Then wipe it with the sponge enclosed and the stripes will vanish from the surface of MAGIC-TOUCH. The abrasion originated from the metal of your key.

As you will notice after this little test, you have not left any visible fingerprint on the surface. MAGIC-TOUCH opens new opportunities for your sales as it is especially applicable for horizontal use.

[www.groupalvic.com](http://www.groupalvic.com)

Since its founding, in 1965, ALVIC has undergone a significant industrial, technological and commercial development. Three industrial plants located in Alcaudete, Carolina (Jaén) and Vic (Barcelona), in Spain, make up a modern industrial complex of over 150,000 square metres for the production of panels and components with different surface finishes for application in all kinds of furniture and decoration.

An efficient distribution network spread over 80 countries and our chain of Alvic Centers allows us to ensure that our products reach our customers with optimum quality and service.

The leading position of the Alvic brand at the national and international level is due to the company's intense innovative activity, in which it invests a considerable percentage of its profits.

## RANGES

### 1> LUXE

The panel Luxe is a result of the application of materials from the latest generation with the most advanced technology in lacquered surfaces.

The Luxe collection incorporates attractive colors, modern wood and digital designs that can be applied elegantly in kitchen, bathroom and home furniture as well as interior design and decoration projects

### 2> ZENIT

ZENIT, a Supermatt surface that enhances the warmth of its velvety touch with metallic particle dispersion in the MetalDeco collection.

### 3> QUADRO

Quadro Synchron brings together traditional forms and character of classic wood with modern structures and finishes, creating a collection of elegant and attractive kitchen cabinets.

### 4> SYNCRON

Synchron Line structured panel, a chipboard panel coated with a selection of modern structures applied on finishes that give the surfaces an extraordinary natural look and highly decorative standard, for added versatility its available in various thicknesses and can be applied in all kinds of furniture, interior design projects and decorations.

Wood: more than just a raw material. The natural basis for our ideas. Kaindl is leader when it comes to innovations in the fields of flooring and interior design. Truly inspiring boards and floors. What began as a small sawmill back in 1897 has meanwhile grown into a global player in the flooring and interior design segment. With products that have always been a step ahead. With plants and high-tech installations that set new standards in the wood-processing industry. And with employees who live out their passion for wood every single day.

## RANGES

The origins of Probos Group go back to Proadec – Produtos Adesivos e Decorativos Lda., established in 1977. Since then, it has been dedicated to the extrusion and calendaring of profiles and foils to be used as edgebandings in the furniture industry.

The brand Proadec has always been used on the edges business. In February 2008, the company changed its name to Probos – Plásticos, S.A.

### EDGINGS: PROTECTIVE, FUNCTIONAL AND DECORATIVE

The use of furniture made for the home, the office and other spaces from melamine and postforming boards has become very popular. Although the functionality and beauty of these boards, its edges are generally exposed, leaving the substrate at sight.

In order to cover these areas and in search of more aesthetic products, the edgings have been developed. Edgebands are one of the most important accessories for the furniture industry, not only because the upholstery decorative finish, but also from the technical features, as edgebands protect boards from the impacts and the humidity. The market offers different types from edgings, classified according to their material and the function for what they have been designed. Nowadays, the most relevant are the thermoplastic PVC and ABS edgings.

- ✓ Proadec edgebanding is produced from plastic materials developed to meet the specific requirement of each application
- ✓ Product range has been developed to compliment the wide range of panels available in the market
- ✓ All proadec printed edgings are produced using an enviroment of humen friendly, UV paint technology with excellent UV & scratch resistance
- ✓ All proadec edgings are produced using a special plasticiser-free formula

### 1> EDGE BANDING

#### > Veneer

- Made from the finest selected veneer species.
- Select Veneers available fully FSC certified.
- Standard width – 22mm, but as a manufacturer, all widths are available – please contact us for more details.
- Length of rolls can be tailored to customer requirements.
- Options available: Preglued & Sanded, Fleece only & Sanded, Fleece only, Sanded & Glued.
- Rolled Thickwood – 1mm, 1.5mm, 2mm & 2.5mm thick.

#### > Melamine

Surfaces in – white, solid colours and a wide variety of woodgrains. Standard Width: 22mm. All widths available with min. quantity levels.

#### > PVC/ABS

The largest stock range in Ireland – Standard Width: 22mm / Standard Thickness: 0.4 mm, 1mm & 2 mm.

### 2> FLEXIBLE WRAPPING VENEER

The technology whereby veneer can be used as a cladding to curved surfaces of a prepared substrate e.g. M.D.F./PVC/Aluminium is called Profile Wrapping Veneer. Wrapped mouldings can be lacquered and finished to a very high standard and similar to Solid wood. Thickness details, widths and particular features are agreed in advance. Continuous Finger Jointed Rolls; – Lengths normally 300mts.

### 3> WOOD VENEER

Our humidity controlled warehouse, houses one of the largest raw wood veneer stocks available in Ireland. We can offer up to 20 wood veneers ex stock with the ability to source over 100 veneers at short notice. We can supply a mix of quality grades in crown, half crown, rift cut and quartered material. Veneer layons are also available which are made to order.

[www.merenda.com](http://www.merenda.com)

www.icaspa.com

## RANGES

ICA Group is all about combining tradition and technological innovation in the manufacture of coatings for wood.

With ICA Group, the renowned Italian manufacturing system is expressed through quality, style and the capacity to develop solutions that are ahead of the curve.

A major Italian industrial group with its headquarters in Civitanova Marche (Macerata), ICA Group has 2 production plants in Italy.

ICA Group has all the strength of a large-scale industrial concern that does business around the world – the strength that is required to take on a demanding, rapidly evolving market which demands solutions that are always innovative, high-quality and eco-friendly.

### 1> ICA COLOR TINTOMETRIC SYSTEM

ICA COLOR is an integrated system for the formulation and preparation of pigmented coatings for wood and glass, based on the addition of concentrated coloring products (pastes) to the product that is to be pigmented (base). This enables the creation of any type of pigmented coating (polyurethane, nitro-cellulose, acrylic, water-based, etc.) selected from the 160 shades of the ICA color chart, the 195 of the RAL color chart and the 1950 of the NCS color chart.

### 2> STAIN MIX TINTOMETRIC SYSTEM

STAIN MIX is a tintometric system that is very much appreciated by those operating in the woodworking industry because it makes it possible to achieve a real, simple solution to the problems of coloring, with considerable advantages and savings in production terms.

Types of stains: **IN** and **CNA**.

Founded as a gold leaf factory in the Noris, in 1867 by Johann Gottlieb Eytzinger, the gold smithy today produces the wafer-thin gold leaf in the nearby town of Schwabach. With 50 dedicated and experienced employees, sheet gold, sheet gold flakes, sheet silver, palladium, platinum metals, roller gold and powder gold are produced in our own factory in Schwabach.

### GOLD LEAF COLORS

Eytzinger produces genuine Gold Leaf with 25 different alloys / colors, plus Silver Leaf, Palladium Leaf and Platinum Leaf. We can manufacture any custom square or rectangular gold leaf size between 50 mm and 120 mm. (2 inches to 4 ¾ inches) in loose or transfer form.

#### TRANSFER GOLD LEAF

Gold Leaf mounted by pressure to individual tissue backing. Easy to use inside and outdoors on large surfaces. Each leaf can be lifted by hand and if necessary cut with scissors. Press leaf onto surface prepared with appropriate gold adhesive and remove the tissue backing.

#### GOLD LEAF ON ROLLS

Gold Leaf Rolls are perfect to use on flat surfaces and to create narrow bands. We produce any width from 10 mm to 100 mm (approx. 3/8 inch to 4 inches).

#### POWDER GOLD

For restoration, painting, illumination and calligraphy. Using a complex process, we specially manufacture the finest Gold Leaf Powders using selected Gold Leaf colors. The final screening process ensures uniform particle size for a consistent finish.

#### LOOSE GOLD LEAF

Each Gold Leaf is inserted between the bound tissue pages of a book. Use a gilder's knife or gilder's tip brush to carry leaf from the book to the gilder's cushion, where it will be cut. The gilder's tip can lift whole gold leaves from the book, or pieces from the gilder's cushion to execute the work.

Soudal is Europe's leading independent manufacturer of sealants, adhesives and construction foams both for professional and for retail customers. With almost 2,400 employees at 15 production sites in 4 continents this 100% privately owned Belgian family enterprise, whose founder Vic Swerts is still at its head, has grown to become a major international player and expert in building chemistry. Extensive investment in R&D, a long term vision on innovation and adaption to the needs of local markets are at the base of the outstanding performance of the company. In 2016 Soudal will celebrate its 50th jubilee.

Soudal has always been a frontrunner in supplying quality both of products and service. In 1992 Soudal received the ISO 9002 approval. Soudal, as a relatively small company, was very advanced in this respect among large multinational conglomerates such as Solvay. In 2004, the ISO 9001 approval was obtained. As market leader in silicone sealants, PU Foams, adhesives and damp proofing products Soudal has proven to be able to fulfil the expectations of its customers with regard to quality and service.

The ISO 9001 Quality System is a model for quality assurance in production, installation and servicing. In other words, it covers the entire organisation and all its functions, it is the expression of a philosophy that has been adopted by all employees.

Soudal has also recently obtained the ISO 14001 certification for environmental management. It is a certification similar to ISO 9001 for quality management. This means Soudal is now certified to work in a way to minimise negative effects on the environment by focusing on the operations in manufacturing itself.

Hettich's history is defined by outstanding engineering achievements and bold enterprising decisions. Developing a purpose-built machine, the so-called bending machine, Karl Hettich in 1888 mechanised the production of anchor escapements for Black Forest cuckoo clocks. When August Hettich developed a production line for piano hinges in 1928, he was treading new technical terrain, setting the course for the group's present activities in the furniture industry.

Taking a tremendous gamble in 1930, Paul, August and Franz Hettich set up a new company in Herford. The move to East Westphalia-Lippe took the Swabian brothers to the heart of the German furniture industry. With time, the products changed. Today we manufacture technology for furniture.

The company group is wholly owned by the Hettich family, and with Dr. Andreas Hettich taking over at the helm in 2007, the company's management entered its fourth generation.

# Glutz

www.glutz.com

## SWISS QUALITY SINCE 1863.

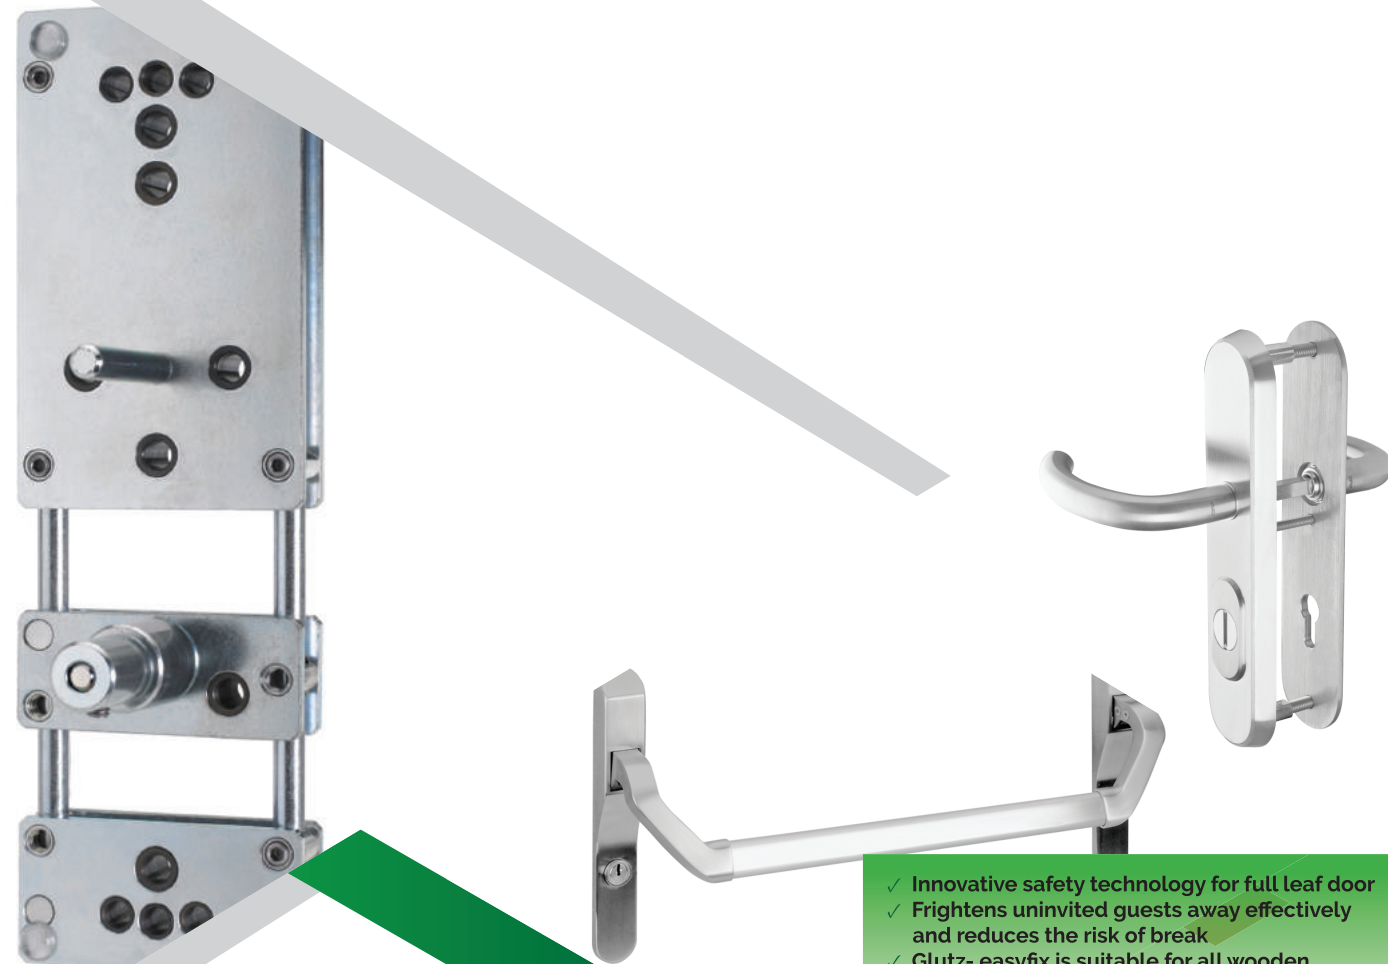

Where tradition and innovation meet, something unique ensues. Glutz has been marketing high-quality Swiss products since 1863. What once started with the manufacture of locks and hinges has developed over the decades into a comprehensive product and service offering. Nowadays, Glutz has grown into a solutions partner with an excellent international reputation.

## THE RIGHT PRODUCT AT THE RIGHT TIME.

Since time immemorial, Glutz has been committed to innovation. Only in this way we can comply with the ever-changing requirements of our customers. With the integration of mechatronic and biometric access systems into our product range, we have taken an important step into the future.

## THE RIGHT PARTNER AT THE RIGHT TIME.

Our most important asset is the confidence of our customers. For this reason, we rely on long-term business relationships, fair and transparent conditions, as well as a comprehensive consulting service. Whether you are a home owner, architect or the person in charge of a large company, as far as we are concerned our ambition is simply to provide you with the best solution.

- ✓ Innovative safety technology for full leaf door
- ✓ Frightens uninvited guests away effectively and reduces the risk of break
- ✓ Glutz- easyfix is suitable for all wooden plastic & metal door
- ✓ Fire resistance to EN 1906:2002-05 is not harmonised standard until harmonisation of EN 1906 with a potential CE making take place

## DOOR + WINDOW FURNITURE

The assortment of fittings from Glutz captivates with its completeness and diversity. Here you will simply find everything you need to equip doors and windows for any construction - down to practical accessory parts.

## LOCKS

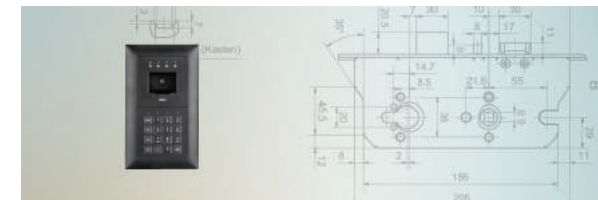

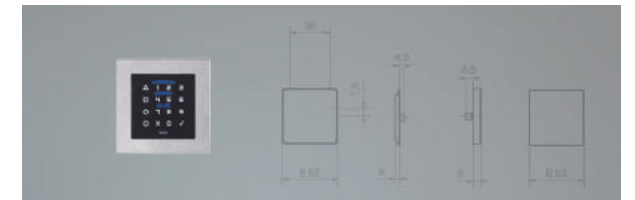

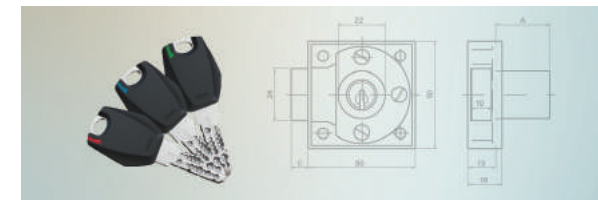

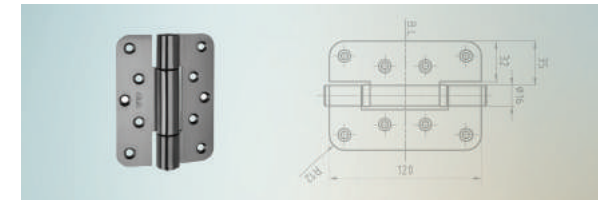

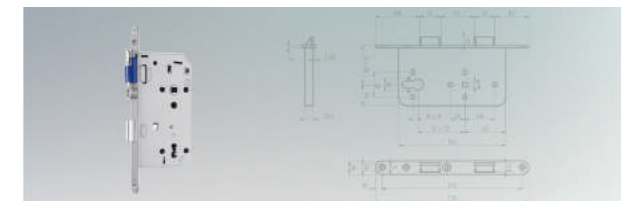

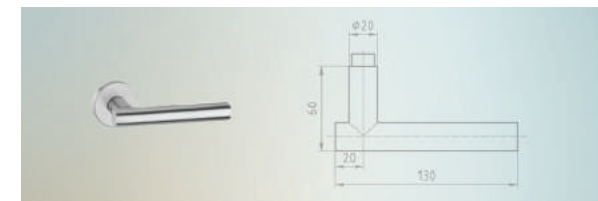

They are installed to frustrate burglars and other uninvited guests. Locks from Glutz meet the highest demands with regard to tested quality, service life, security and precision. In addition,

## MANUFACTORY

Historical buildings and antique furniture tell us compelling stories from the past. We want to preserve the authenticity of these objects: We reproduce and restore antique metal fittings in the highest quality with our unique know-how and historical accuracy.

## HINGES

Project hinges from Glutz are proven in everyday use over several decades of use. This is assured with the high quality of the material (stainless steel), intelligent development and painstaking workmanship. The assortment meets practically all requirements.

## MASTER KEY SYSTEMS

A system for perfect locking: for secure locking points or demanding keying systems with maximum copying protection.

## WIRELESS ONLINE SYSTEMS

The eAccess wireless access system from Glutz detects persons who are authorised to access the fittings. And they are allowed to enter. Simply approaching with a clip or a card is all it takes - and the lock automatically unlocks. Simple, comfortable, and secure.

## CUSTOM-MADE SYSTEMS

As individual as your requirements: Specialists from Glutz plan and develop your system - from the lock to the biometric reader.

## INDUSTRIAL COMPONENTS

Glutz: your first stop for high-quality industrial components.

www.vogl-deckensysteme.de

Established in 1953. "It is our goal to turn buildings into eye-catchers with our ceiling solutions through form, color and performance, and to enhance their value durably."

Vogl ceiling systems permit manifold additional functions by integrating illumination and technical installations.

### CEILING SYSTEMS

Our sophisticated ceiling systems give the architect a high degree of design liberty, like for example acoustic design ceilings with integrated air purification effect or a modern design with floating ceiling, 3D element or customized molded component. We offer a diversity of innovative ceiling design that gives every room that certain something by integrating illumination (coved lighting, light channels, stretch ceilings) and technical installations – such as extra functions for example. Heating and cooling elements contribute to conserving energy resources and protecting the environment and, in addition, help save operating costs.

### ACOUSTICS MEETS DESIGN

Acoustic design ceilings are the most significant instrument in the acoustic design of a room. In determining the right sound absorption, various factors such as room volume or planned utilisation play a major role. Acoustic ceilings can also be convincing from a design point of view.

General statements regarding good or bad absorption do not make much sense. An individual calculation must be performed for each construction object in order to come up with the right room acoustics.

Three applications for absorbing materials are available to suit the different purposes:

- room acoustic design,
- noise reduction.
- control of reverb time.

FOAMGLAS® thermal insulation is manufactured by Pittsburgh Corning, one of the world's leading manufacturers of cellular glass insulation.

FOAMGLAS® is a light weight, rigid and durable insulation material composed of millions of completely sealed glass cells and offers a unique combination of properties such as incombustibility, superior compressive strength and long lasting thermal insulation performance. It is available in a wide range of shapes and sizes to satisfy various building requirements and industrial specifications.

| - BUFFER AND COLLATING | - INNOVATIONS        |

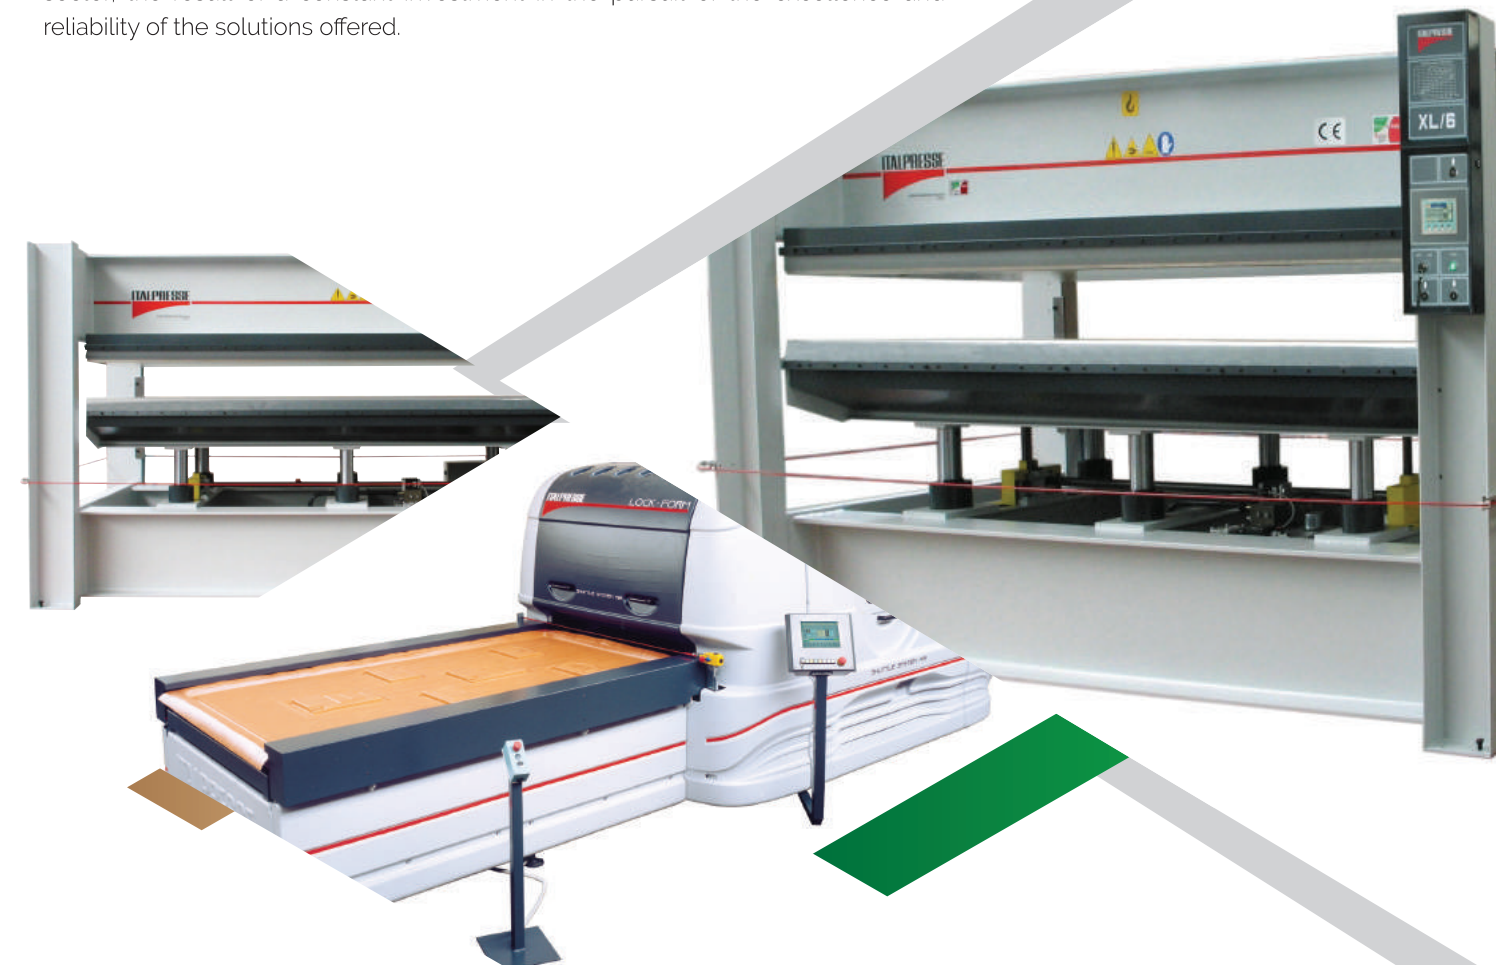

Since 1954, Italtresse has designed and manufactured a wide range of hydraulic presses and lines complete with pressing intended both for craftwork and for large industries in the following sectors:

- Wood (panels, furniture, doors and windows, laminate flooring, wooden building components, etc...)
- Polyurethane and other foam materials
- Automotive
- Composite materials and solid surfaces
- Light weight, sandwich and honeycomb panels
- Recycled materials (wood, rubber, polyurethane, glass, cork, etc...), thermal and acoustic insulation, fibre cement, the caravan industry.
- We are also able to design and develop special and custom applications based on specific customer requirements.

All the factories are located in Italy, in the area around Bergamo, a place where excellence in precision engineering has deep roots. The investment indices in personnel training and research and development are among the highest in the industry. To directly control all the phases that determine quality and efficiency, we have a large fleet of constantly updated CNC machine tools and an advanced design and order management system.

Our partners can therefore benefit from a unique know how and structure in the sector, the result of a constant investment in the pursuit of the excellence and reliability of the solutions offered.

Technologia Middle East W.L.L. was established in May, 2002 with the specific goal of serving the fast growing woodworking, aluminium, glass and metal industries solutions. In our fast changing world today technology plays a critical role.

Technologia Middle East W.L.L. has been trying to contribute its share of responsibilities towards our customers and the community with utmost care and perfection by providing intelligent industrial solutions and supplying the most technologically advanced and enduring machines.

We believe our customers will continue receiving still better technology, customer care and facilities that have been our hallmark. We represent various globally reputed manufactures and suppliers of Europe and Asia. We are equipped to serve our customers with the changing technology and supports.

Our technical team comprises of qualified Engineers and Technicians. We do installation, repair & maintenance of industrial machines, equipments & tools, industrial consulting and training services.

- ADHESIVES & GLUE

- AIR TOOLS

Nothing is more expressive of the culture and art of living than architecture. There in Morocco, Artisans creatively mastered the art of shaping pottery, stone, wood, gypsum curved and zillij via ancient inherited traditional and modern ways that bears out the originality and beauty of Moroccan culture.

- ROMI ZILLIJ (CEMENT TILES)- FIRST MANUFACTURING IN BAHRAIN, MOROCCAN CURVED WOOD.

- STONE.

- GYPSUM WORK.

- ARTS PAINTING.

- TRADITIONAL AND MODERN MOROCCAN ZILLIJ WORKS.

# BESPOKE PRODUCTIONS

AL NOOH WOOD DESIGN provides bespoke production services - full design, specification and production service for all types of joinery projects to any level of scale or complexity, including installation on site. We are happy to assist you with our expertise to tailor your ideas. We believe that personal focus gives better results, we strive to achieve maximum client satisfaction by meeting the expectation level by being professional and operating responsibly. We have highly experienced, enthusiastic and passionate workforce at your service. We continuously strive to achieve contentment from our customers.

- BUFFET UNIT
- CEILING
- CLOSETS & BOOK SHELVES
- DOORS
- FITOUTS & DISPLAY
- FLOORING
- KITCHENS
- STAIR CASING
- WALL CLADDING & DECORATIONS
- WASH BASIN, VANITY & BATHROOMS

# PROJECTS

AL NOOH WOOD DESIGN holds extreme pride in working on unique design and wood works for our retail, residential and office fit out clients. We provide full fit out interior work, wood works like – doors, flooring, ceilings, partitions, counters, and cabinets as well as all the electrical and mechanical work. We deliver not just designs, but exquisite and elegance. We make continuous effort to satisfy our esteemed customers.

## IN-HOUSE FACILITIES OUR FACTORY

AL – NOOH WOOD DESIGN is established with an excellent in-house facility which covers production space of over 7000 meter square which empowers our team to work on the product innovation and delivery.

We are capacious of a wide range of high quality and rare natural veneers , over 40 species of solid wood and several woodworking related products like kitchen accessories , special effect paints, parquet flooring etc.

We are equipped with over 100 high performance steel and woodworking machines, turn - key projects and interior fitments.

Our warehouse is fully stocked with complete range of equipment including forklifts, cranes, trailers, and trucks and backed up with transportation facility for large items.

We have the best post forming facility for the process of post forming laminates, PVA and natural veneers and pressurized painting with chillers and drying chamber and also dust extraction factorization systems which ensures safe and dust-free environment for painting and polishing.

The in- house facility at AL-NOOH WOOD DESIGN is facilitated to undertake various processes like the veneer profile wrapping, PVC or ABS edging, fabrication of solid surfacing Gibraltar both in 13 mm and 3 mm (SSV) and the fabrication of solid surface top (Staron).

We undertake -Thermoforming processing: the process of thermoforming laminates, PVC and natural veneers on plain substrate and pre-shaped wood – CNC processing: computerized routing and shaping of all types of surfacing with advantages of PVC edging and optimization.

Our in- house tooling and blades servicing center serves the requirements of both our factory and the industry. It is aided by special high resistance plastic Koru – Guard that is both impact proof and chemical proof.

We are affiliated with leading international companies, suppliers and factories. We are supported by well-trained , experienced and qualified workforce dealing in valuable resources, say machinery, materials and accessories, which in turn helps us to be the leaders in providing best quality services and products.

# CLIENTS LIST

# APPENDIX

## 1. FSC – FOREST STEWARDSHIP COUNCIL

Forest Stewardship Council is the gold standard of forest management because it protects water quality, prevents loss of natural forest cover, prohibits highly hazardous chemicals, and protects customary rights of indigenous people and local communities. It is the only forest certification system governed by an open membership (General Assembly) where interests are equally balanced by economic, social and environmental chambers.

## 2. CARB - CALIFORNIA AIR RESOURCES BOARD (CARB)

CARB certified products are composite panels in compliance with Phase 1 or Phase 2 emission requirements of the California Air Resources Board (CARB) ATCM 93120; or have secured a "no added formaldehyde (NAF)" or "ultra-low emitting formaldehyde (ULEF)" resin designation and thus not requiring third party certification under this regulation

## 3. LEED – LEADERSHIP IN ENERGY AND ENVIRONMENTAL DESIGN

Leadership in Energy and Environmental Design (LEED) is one of the most popular green building certification programs used worldwide that aims to help building owners and operators be environmentally responsible and use resources efficiently. There are 100 possible base points distributed across six credit categories: Sustainable Sites, Water Efficiency, Energy and Atmosphere, Materials and Resources, Indoor Environmental Quality, Innovation in Design

## 4. PEFC – PAN EUROPEAN FOREST COUNCIL

PEFC certification is a standard of choice adopted by numerous private and public sector organizations responsible for procurement and procurement policies.

## 5. ISO 9001:2008

ISO 9001:2008 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements, and aims to enhance customer satisfaction through the effective application of the system, including processes for continual improvement of the system and the assurance of conformity to customer and applicable statutory and regulatory requirements.

## 6. ISO 14001

ISO 14001 sets out the criteria for an environmental management system, it maps out a framework that a company or organization can follow to set up an effective environmental management system. It can be used by any organization regardless of its activity or sector. Using ISO 14001 can provide assurance to company management and employees as well as external stakeholders that environmental impact is being measured and improved.

## 7. OHSAS 18001

OHSAS 18001, Occupational Health and Safety Assessment Series, (officially BS OHSAS 18001) is an internationally applied British Standard for occupational health and safety management systems. It exists to help all kinds of organizations put in place demonstrably sound occupational health and safety performance. It is a widely recognized and popular occupational health and safety management system.

## 8. ISO 50001:2011

The standard specifies the requirements for establishing, implementing, maintaining and improving an energy management system, whose purpose is to enable an organization to follow a systematic approach in achieving continual improvement of energy performance, including energy efficiency, energy security, energy use and consumption. The standard aims to help organizations continually reduce their energy use, and therefore their energy costs and their greenhouse gas emissions.

## 9. GREEN GUARD

GREENGUARD Certification are scientifically proven to meet some of the world's most rigorous, third-party chemical emissions standards—helping reduce indoor air pollution and the risk of chemical exposure while aiding in the creation of healthier indoor environments.

## 10. EMICODE EC1 PLUS CERTIFICATE

The EMICODE® classification system allows to compare and evaluate the emission characteristics of flooring installation and construction products and at the same time gives an incentive to further improve the products. This trademark-protected classification system by now has become the key national and international quality benchmark for a wide range of product groups.

## 11. BS – 1088 STANDARD

BS 1088 is the British Standard specification for marine plywood that applies to plywood produced with untreated tropical hardwood veneers that have a set level of resistance to fungal attack. The plies are bonded with Weather Boil Proof (WBP) glue. The standard is associated with Lloyd's Register since it performs testing of products to this standard. It does not follow that it is a structural plywood.

## 12. BREEAM

BREEAM (Building Research Establishment Environmental Assessment Method), first published by the Building Research Establishment (BRE) in 1990, is the world's longest established method of assessing, rating, and certifying the sustainability of buildings. BREEAM aims to reduce the negative effects of construction and development on the environment.

## 13. BM TRADA CERTIFICATION

BM TRADA is the internationally recognized standard for quality. Certification to it reassures your customers that your organization is fully committed to quality by continuously undergoing the scrutiny of an accredited third party certification body.

## 14. IFC CERTIFICATE

IFC Certification Ltd is a UKAS accredited and internationally recognized provider of high quality customer focused independent third party certification. IFC Certification Ltd is also a Notified Certification Body for certifying products for CE Marking under the Construction Products Directive.

## 15. EMAS

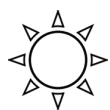

Environmental certification is a form of environmental regulation and development where a company can voluntarily choose to comply with predefined processes or objectives set forth by the certification service. This is seen as a form of corporate social responsibility allowing companies to address their obligation to minimize the harmful impacts to the environment by voluntarily following a set of externally set and measured objectives.
