Design and Build Capability

About Us

First Aurora is a leading provider of business technology solutions in Asia Pacific since 2004 with a blue chip clientele that includes Apple, Julius Baer, Uber, Regus.

We have offices in Singapore, Hong Kong, Malaysia, New Zealand, & Australia.

We specialize in complete IT solutions for hotels, commercial offices, trading rooms, educational institutions, and data centres.

First Aurora staff hold relevant industry certifications to support all Audio Visual and Structured Cabling works. We are a certified member of AVIXA, the leading resource for AV standards, certification, training, market intelligence and thought leadership. We are also a certified designer and installer partner with most leading cabling products.

We have a strong track record of implementation capability with signature projects deployed in:

Australia, New Zealand, China, Myanmar, Indonesia, India, Singapore, Malaysia, Thailand, Hong Kong, South Korea, Japan, Vietnam, Brunei, Philippines.

We can provide local billing in Australia, New Zealand, China, Indonesia, Singapore, Malaysia, Thailand, Hong Kong, Japan, Philippines and Vietnam.

Health & Safety Statement

As part of the First Aurora's Health & Safety Policy, we will:-

- Provide health & safety policy training to all staff.
- Ensure all staff are competent and adequately resourced to address the health and safety issues likely to be involved onsite
- Check that clients are aware of their duties
- When carrying out design and build work, avoid foreseeable risks to those involved in the construction and future use of the equipment, and in doing so, they should estimate hazards and reduce risk associated with those hazards which remain.
- Provide adequate information about any significant risks associated with the design and build.
- Coordinate work with that of others in order to improve the way in which risks are managed and controlled.
- In carrying out those duties, our designers and installers need to consider the hazards any risks to those who carry out construction work including demolition.
- Use a structure designed as a place of work may be affected by such work, for example customers or general public.

Why choose First Aurora?

- With our partners, breadth and depth of experience , we are able to offer you choice for a competitive price with a quality solution and service throughout Asia Pacific markets.
- Our team has experience in Audio Visual and IT Infrastructure design & build, both in Singapore and across Asia Pacific for large multi-national organisations. We support leading global companies regionally such as Apple, Uber, and Regus.
- Vast experience installing Crestron, Extron, Barco, Clearone, Harman, Sonos, AMX, BIAMP, Shure, JBL, all display brands, touchscreen meeting room boards, and Nureva, Polycom & Cisco conferencing solutions.
- Top level management maintain a hands-on involvement in projects.
- Committed team who understand the need for effective communication and in non-English speaking markets.
