

OUR MISSION

to reduce employers' workers' compensation costs

COMPLIANCE

HR and Safety onsite compliance audits are available, as well as training and certification for all types of businesses.

Our SPHR can do it all - from handbooks to HR management.

Our Certified Safety Professional can provide onsite training and programs for DOT, OSHA 10 & 30, CPR/First Aid, Forklift and more.

PROFIT LEAKS

We detect and correct the profit leaks inherent in every work comp program that drives the costs.

Incorrect class codes, subrogation filing, experience mods and premium audits are just some of the profit leaks that may be costing thousands annually.

We also offer a Premium Recovery Audit on a contingency fee basis.

CLAIMS

We provide employers with immediate, ongoing injury and claims management consulting.

Our licensed, experienced adjusters act as your advisor and advocate to ensure your interests are represented.

In addition, we attend mediations on your behalf to insure claims are resolved with the least amount of impact on your premium.
