

## Label of the bottle

### Remarks:

The color of the oil in the clear glass bottle is deeply golden. The glass bottle itself has a white lock and a white pipette. The design of the label should harmoniously match those colors.

The drop will be cut out by the printer, so the customer can see the golden oil in the bottle. Please just make the outer line of a nice, harmonic, symmetric drop. This is one of our key ideas. No other competitor has it.

The black frame lines are just there to show the 3 different areas of the cover. In your design, we do not need a black framework.

These information: Charge: 1234/2019 and Mind. haltbar bis: 10/2021 will be filled in by the printer

Feel free to change anything in terms of the design. Be creative. I just made this graphic in Word to show the necessary elements that need to be on the cover.

We want a puristic and elegant design. Everything should look harmonious and expensive. If you have any ideas concerning background color, background elements, additional elements, or whatsoever, we highly anticipate your suggestions.

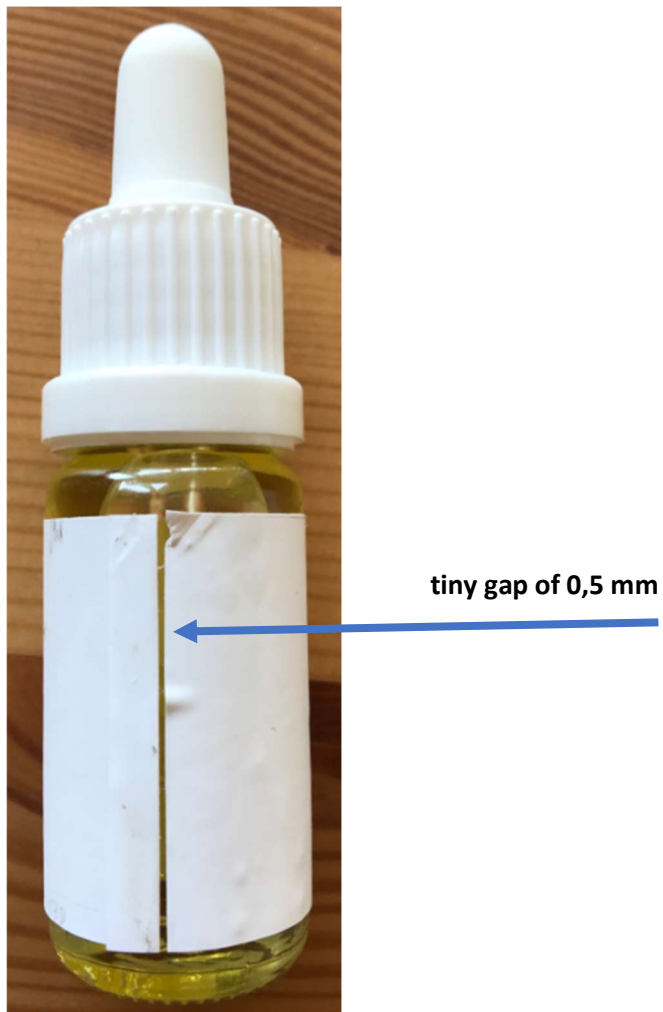

We made our product, the bottle and the box something special. Please make the design something special, too.

There are many other products to come. If your design is great, we would love to cooperate with you in future.

This is a handmade approach...

Please consider:

The gap on the backside is very tiny. We thought it would look nice this way. Please consider this fact when doing your design and placing the 180° text.

Text orientation on the backside (suggestion):
