

EDTA (Calcium Disodium EDTA) is a pharmaceutical grade chelating agent designed to bind and render inactive certain trace metals. This product is intended to supplement chelation therapy of plaque and other mineral deposits throughout the cardiovascular system. Since EDTA may deplete levels of important vitamins and minerals, supplementing your diet with a daily multi-vitamin is recommended. Not recommended for pregnant or lactating women.

CONTENTS AND USE: Each capsule contains 600 mg. Calcium Disodium EDTA. Take 1-3 capsules daily.

These statements have not been evaluated by the Food & Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

EDTA (Calcium Disodium EDTA) Chelation Formula

100 capsules / 600 mg.
