

Logos for CRACA and PIGLET

Wednesday, 12 June 2019 8:47 AM

I currently promote three apps on my www.geocalcs.com web site with the following three logos

**Lateral
Analysis
of Piles**

**Data
Map**

**Pile
Driving
Analysis**

LAP

Datamap

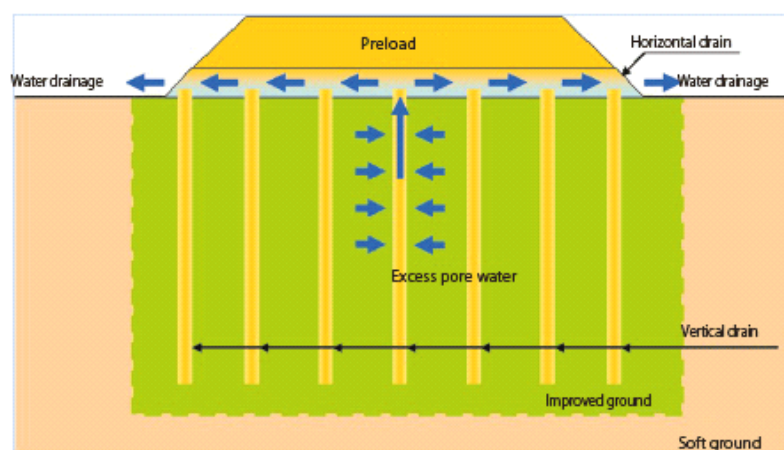

IMPACT

I would like two more, to promote two new apps and need two new logos

CRACA

The first app is call CRACA. I would like to include the cloud with CRACA inside the cloud, similar to LAP and IMPACT above. And the cloud should site on an "embankment", similar to what is shown below. If it is not too "bususy" I would like to show the vertical drains and some arrows for the water.

Next to the logo, the text should read "CReep and Consolidation Analysis"

PIGLET

The second app is called PIGLET. This is a spreadsheet based program and not a web/cloud based program. So this logo should not include a cloud..

The logo should have the word PIGLIET inside the box, sitting on a "Pile Group" a bit like the image below. The arrows and dimensions are probably not needed.

Outside the box the text should read "Pile Group Analysis Program "
