RICHER DATA TO DRIVE YOUR BUSINESS

Focal image

COMPREHENSIVE COMPANY INFORMATION

COMPANY API

BRING MAPPING DATA INTO YOUR BUSINESS

LOCATION API

Aptitude is setup for connected world. A world where data is integrated, comprehensive and useful. Where systems are designed to cooperate to make businesses more efficient. For this purpose we have focused on two key areas of work - location and company data.

Our [Postcode API](#) is the most current in the marketplace, helping anyone pinpoint a map simply by providing a postcode. This allows you to assign a location to your postcode-level business data. We also provide an [Address API](#), giving you an address for any postcode along with it's coordinate on the ground. We also supply base maps for customers looking to use [maps on their website](#). And we supply a wide range of [bespoke GIS services](#) for more specific mapping work.

For company data we have restructured Companies House data into something more useful and practical for businesses. Just supply one or more company numbers and we can send you back [detailed company information](#) covering a raft of data. Better still this data can be supplied either as a file or by API so you can receive it in the format you prefer.

COMPANY API

FROM ONLY £29 pm

You supply one or more company numbers - we send back everything via a simple API or CSV file

DEMANDING DATA REQUIREMENTS? LOOK NO FURTHER

Most businesses looking for our help have complex data requirements they need to piece together. It may be they have an in-house team, but if not, we can help with:

- Connecting our API into existing systems and software
- Helping with more complex business or location data supply
- Placing experienced staff on site to assist with mapping and data projects
- Helping businesses automate and digitally transform

So if you want us to help you take your integrations up a notch, then let's talk. Please call **0000 000 000** or

COMPANY DATALOCATION DATA SERVICES ABOUT US

FROM ONLY £29 pm

COMPANY DATA DELIVERED TO YOU

Focal image

COMPANIES HOUSE DATA WITHOUT THE HEADACHES

Most businesses know they have a large appetite for companies data, and yet they still rely on visiting websites and copy and paste to get the information they need, record by record.

Some businesses have tried using the Companies House API, but have found that it is clunky and not in a ready-to-use format. Though the data is there, they need to get it out, automatically.

ALL THE COMPANY DATA YOU NEED, IN ONE FEED

We decided to simplify the process: you send us one or more company numbers and we send you back all of the items below, for one simple price.

From company number to company type, adress to SIC code	COMPANY INFORMATION
Full names, addresses and postcodes of directors of companies	CONTACT INFORMATION
Three years of employee numbers, assets and debtors (BETA)	FINANCIAL INFORMATION
Charges, insolvencies, delays to accounts and resignations	ALERTS & NOTIFICATIONS

Or, in some cases clients want more than this and to merge more than one data source, if so then please explore our [Bespoke Company Data Services](#).

GO AHEAD: TEST OUR DATA; OR LET'S TALK IT THROUGH...

If you are confident you know what you want, why not [start a trial](#)? It's free of charge and you can test the service for a limited time. If you are not so sure or you have a very specific requirements then talk to our consultants.

ABOUT US

WE CAN SET UP, INTEGRATE WITH AND ENHANCE YOUR DATA

Focal image

BRING THE DATA YOU WANT DIRECTLY INTO YOUR SYSTEMS

The true value of data is when it is in the right place and you can use it for the specific purposes you need it for. So that it's formatted correctly so that you can put it to use. For many clients, they already have their systems in place, and are confident they can take the necessary steps to ensure that the data is used for the purpose intended.

IF YOU NEED SOME HELP... JUST ASK

The trouble is that full integration is not always straightfoward, often the data is available, but not in the right place for clients. Which is where Aptitude can fill the gap.

We are here to help companies coordinate their data and use it as efficiently as possible. We want to see businesses work effectively and put the data we supply, or other sources, and bring it together in a coherent shape for clients.

WHAT DOES OUR 'HELP' LOOK LIKE?

Connecting systems and aiming for automated seamlessness	API & INTEGRATIONS
Complex location and mapping data delivered	MAPPING SERVICES
Helping businesses become more digitally efficient	DIGITAL TRANSFORMATION
Supplying quality staff to help with bigger projects	ON SITE EXPERTISE
Identifying your data needs and securing data licenses	LICENSING & IPR

So if you want help in getting your company, business unit or organisation more connected, then contact Aptitude by calling **0300 000 000** or [sending us an email](#).

GO AHEAD: TEST OUR DATA; OR LET'S TALK IT THROUGH...

If you are confident you know what you want, why not [start a trial](#)? It's free of charge and you can test the service for a limited time. If you are not so sure or you have a very specific requirements then talk to our consultants.

COMPANY DATALOCATION DATA SERVICESABOUT US

FLEXIBLE PRICING TO MEET YOUR REQUIREMENTS

Focal image

TRANSPARENT PRICING WITH GROWTH BUILT IN

We have made our pricing structure for our **standard data feeds** to suit any size of business from the smallest startup to the largest corporate. Better still, you can download it from us, or you can receive via an API, so you can choose you can choose how you dine at our 'data buffet'.

COMPANY DATA FROM £29pm

LOCATION DATA FROM £29pm

DO YOU NEED MORE DATA? INTEGRATION? SUPPORT?

Many clients need more than just the data we have. They are looking to merge data suppliers or to call other systems. Or they know the data they want, but they need to integrate it.

We can support extensive projects, either by architecting them for you, running the project or supplying services on site or from our offices.

If you have this requirement, let's talk. Contact Apitude by calling **0300 000 000** or [sending us an email](#).

COMPANY DATA - API or CSV

Every Call contains (where available):
Company Information: Company Number, Company Name, Company Age, Company Type, Company Status, Company Address, Postcode Easting, Postcode Northing, SIC Code, Number of Active and Current Officers, Officers Names, Number of Active and Current Significant Persons, Parent Company;
Contact Information: Name, Identity, Correspondence Address and Postcode of All Shareholders, Directors and Persons of Significant Control, Full Registered Office Address of Company
Financial Information (BETA): Accounts Software Used, Accounts End Date, Number of Employees (last 3 years), URL to Filed Accounts (last 3 years), Tangible Assets (last 3 years), Fixed Assets (last 3 years), Trade Debtors (last 3 years), Debtors (last 3 years), Current Assets (last 3 years)
Alerts & Notifications: New Accounts, New Annual Return, Shareholding Changes, Board Appointments, Board Resignations, CCJs, Dissoloutions, Insolvencies, Charges

FIND OUT MORE

FREE TRIAL

FROM ONLY £29 pm

Terms: The price quoted covers your first 200 Calls per month. A Call is a request for information on one unique company number and covers the return of all the data we can for that number, by whichever export method you use. It will be as complete as it can be, recognising that Financial Information is partial and in many cases empty. Further Call requests are at £0.10 per Call. If you require more than 10,000 Calls per month then we can setup a bespoke account for you.

LOCATION DATA - API or CSV

Each Call is one of two requests:

- Postcode Gazetteer:** A postcode is supplied and the corresponding map coordinate is returned. This allows business, property or financial data with a postcode to be positioned on a map.
- Address Gazetteer:** A map coordinate is supplied and a postcode is returned. This allows business, property or financial data to be assigned a valid current postcode.

WE INVITE QUESTIONS, THIS 'DATA' THING ISN'T EASY!

For every client that is able to take our data and work with it from day one, there are others that find it raises more questions: How best to receive it? How to integrate it? How to make it work with another service?

We've heard most of the questions before, and ones we haven't? Well, we won't know until you ask us.

CONTACT US YOUR WAY
