

# Current State

- Patients are discharged to home with one of a myriad of homehealth companies
- No homehealth companies focus just on Cardiac Surgery
- Homehealth care is not tightly integrated with the hospitals
- Care ~~between~~ and information between HHC + Hosp is not well coordinated
- Frequent Readmissions to hospital
- Readmissions are costly in many ways not just monetary

# Activity

- Hire experienced health care providers (HCP)
- Educate/Train HCPs on Common Complications
- Improve Communication of HHC, Hosp, + Patient
- Educate Hospitals on this innovative approach

# Solution

- All Patients are discharged to home with the same HHC who is an expert in Cardiac Surgery patients
- Form an organization whose primary goal is care for Post-op Post-discharged Cardiac Surgery patients
- Integrate and Coordinate the care between Hospital + HHC

# Outcome

- ↑ Patient Satisfaction
- ↑ Quality of Life for Patient
- Fewer Readmissions
- Improved Reputation of Hospital
- Significant Cost Savings to Hospital
