## Capability Statement

Phoenix Metal Form.... Metal Made Easy!

Established in 1981, we manufacture quality steel components to the building, mining and electrical industries. Offering friendly and personalised service for all your steel needs, we can customise our products dependant on our customer needs.

We have manufacturing locations in Perth, Sydney, Brisbane and Townsville.

We pride ourselves on fast turn around to meet our customer's time frames and flexibility whilst maintaining our excellent value for money and producing high quality products.

Our experienced fabricators use only the latest in CNC equipment to produce only the highest of quality products and services from larger steel jobs right through to simple spot welding.
