

Logo Modifications

Dear designer,

I would like to give some more details regarding design requirements:

1. Face
 - Choose a happy face
 - Please try to combine it with a tray of food like in the first 2 sample here. This may also be possible with one of the other faces.

1			The original one but the tray is here too far away from my face, making the icon become too tall
2			Here the location of the tray is perfect – similar asin your first solution!
3			Perfect hair, if possible use one plumeria flower as here, face expression not ideal.

4		My favorite expression, here also with tray
---	---	---

2. Abstract face

- Please try to render my face abstract, the following solutions are suggestions:

	<p>Make it abstract with lines like this one. But please don't take this as a reference in face expression, for this, see point 1.</p> <p>What I like also is how the hair has been made abstract (If you do it alike, you can replace the butterfly with a plumeria above the ear, as in Nr. 3 above)</p>
	<p>You may also render the existing picture directly instead of drawing it. If you place this besides the logo in the right colors it can look nice also.</p> <p>But if you do this without tray, please find another way to show that this is about food...</p>
	One plumeria flower may be added (preferably at my hair)

The tray

- Please don't use a chicken since the food may contain vegetarian and other options
- Location of the tray, see above, image Nr. 2
- Tray suggestions (it can be simplified, because my food is hard to recognize when made abstract):

Structure, colors and fonts

- Please follow the structure as before, with the icon on the left and the logo on the right side with subtagline below
- Please provide a logo that works on white as well as on black background
- I like black and white colors for font or banana leaf green.
- I prefer if you use a bold and lightly cursive font for "Dapura Mia"
- For the subtagline a straight font probably works better (legibility)
- The subtagline may look better after the "p" of Dapura Mia but this depends

Following is only an example:
