INTELLIGENCE

- 💡 **MARKETPLACE:** import your free intelligence feeds and tools
- 👤 **SUBSCRIBE:** access commercial grade security automation modules and workflows
- 🔄 **USAGE BASED:** import and run what you need

Security Automation provides your organisation with immediate skills and capability enhancements through specialist security workflows designed to streamline your operational security activities and maximize the effectiveness of your security budget.

Our Security Automation Platform, Evolve, delivers five pillars of Security Automation:

- Automated Penetration Testing
- Automated Compromised Account Monitoring
- Automated Incident Response
- Automated Security Infrastructure Orchestration
- Automated Cyber Threat Intelligence

Evolve transparently implements proactive protection through seamless collection of global threat sources and integration of Cyber Threat Intelligence feeds into Evolve Workflows and your internal security solutions.

Evolve Security Automation gives organizations and security teams access to the latest threats - and keeps them up to date. Over 350 Cyber Threat Intelligence feeds are freely available from the Evolve Marketplace.

These cover the major threats to you and your business including:

- RANSOMWARE AND C2 INTELLIGENCE
- SPAM AND PHISHING INTELLIGENCE
- TOR AND OPEN PROXY INTELLIGENCE
- ATTACKS AND BRUTE-FORCE INTELLIGENCE
- DDOS INTELLIGENCE
- GAMING, TORRENT AND BITCOIN NODES INTELLIGENCE

SEAMLESS INTEGRATION INTO YOUR SECURITY

Evolve delivers seamless integration of Cyber Threat Intelligence into your on-premise and cloud security infrastructure for proactive protection. This can be achieved via the Evolve Agent, the Evolve SDK or the Evolve CLI.

Security teams benefit from the native integration of Cyber Threat Intelligence for enhanced breach detection across the Evolve Solution Suite, including Automated DNS Sinkhole Breach Detection, Automated Syslog Breach Detection, Automated Penetration Testing and Automated Incident Response.

SIMPLE INTELLIGENCE MANAGEMENT

Evolve makes collecting and aggregating multiple Cyber Threat Intelligence feeds simple using the Evolve Data Gateway to manage and prioritize the threat data to help ensure your business stays safe.

AUTOMATED INTELLIGENCE SHARING

You can now share Cyber Threat Intelligence, privately and publicly with a few clicks. Your business and industry partners will benefit from industry-specific Cyber Threat Intelligence. Automated sharing and integration with your organization's security solutions helps build proactive contextual breach detection and prevention.

Let Evolve automatically increase the intelligence of your organisation and help you stay on top of the latest threats, attacks and security breaches to keep your business safe.
