

Nature's Living Soil

Just Water from Seed to Harvest*

AUTOFLOWER

Living Soil Concentrate

Net Weight One Pound

This concentrate contains all the nutrients your plant will need from seed to harvest. Our concentrate is teeming with beneficial microorganisms and fungi designed to help develop a healthy roots system. These microorganisms form a symbiotic relationship with the roots to provide the roots with the nutrients they require in a form that is readily available to the roots. The living soil will take care of most of your plants root system needs.

NOTE: Contents may smell foul when opening the bag, this is normal. The smell will go away when used. *Mix with organic potting soil.

STORAGE: For long term storage open the bag and store in a cool, dark place. To use after storage just add water until moist and place in a warm (72 degrees F+) one week before planting.
