

ENTERPRISE SYSTEM MANAGEMENT

LAN Systems, Inc. designs, installs, and manages complex, mission-critical enterprise systems for our customers, increasing the reliability, security, and efficiency of their IT operations while meeting stringent requirements. As part of our overall network operation and management services, we continually analyze and monitor enterprise system components and create systems that can adapt to rapidly changing needs.

We employ a knowledge-centric service delivery assurance methodology designed to keep customer mission-critical systems at peak performance. This methodology utilizes network and traffic simulations to identify potential changes in performance or possible security issues within a particular network, allowing our engineers to protect customers' systems and data. Our network engineers are trained and certified in the leading commercial enterprise tools and combine that knowledge with our techniques, experience, and processes to deliver solutions to our customers. Our enterprise systems management services include the following:

- Infrastructure and Enterprise Systems Management
- Infrastructure Operations and Management
- Outsourcing and Managed Services
- Infrastructure Consolidation and Modernization
- Application and Network Management
- Application and Business System Performance Measures
- Network Design, Implementation, and Migration
- Network Monitoring and Performance Evaluation

 - Performance tuning and monitoring

INTRODUCTION

LAN Systems Inc, (LSI) is in the business of helping IT organizations operate more productively and profitably through a full spectrum of specialized staffing and project implementation products and services.

We specialize in the areas of Systems Integration & Upgrade, Messaging Support and Archiving, Document Management Solutions, Network Implementation & Support for vertical markets such as legal, financial services and government. We deliver qualified consultants and project managers for both contract and ongoing requirements across all science and technology disciplines. Headquartered in the DC Metro area, our tri-state presence helps us provide scalability with an immense talent pool that enables us to reliably serve customer needs at the enterprise level. We work hard and realize that in today's marketplace TIME equals PROFITABILITY. Therefore, we cater our solutions to be cost-effective with both speed and efficiency.

NETWORK ENGINEERING

LAN Systems, Inc. offers a full lifecycle of network engineering services to our customers from the initial requirements analysis and network design through solutions implementation and testing, including designing disaster recovery contingency plans.

Our network engineering capabilities include architecture development, design, implementation, configuration, and operation of LANs, and WANs. Our extensive experience providing the following network engineering services for customers allows us to rapidly identify potential bottlenecks, security threats, and vulnerabilities, as well as address these potential issues with cost effective solutions:

- Architecture Development and Design
- Disaster Response Planning and Recovery
- Installation, Test, and Evaluation
- Network Configuration
- Network Security Evaluation
- Protocol and Topology Selection
- Reliability and Contingency Assessment
- Requirements Analysis
- Routing Design
- Vulnerability Assessment

PROGRAM/ PROJECT MANAGEMENT

LAN Systems, Inc. can help you plan, schedule, control and manage your projects. We have a proven set of project management tools and methodologies which we have implemented for our clients to address their needs.

We can establish and manage a process that meets your needs and which is designed to support your entire organization. Our tools will ensure that information flows to the staff and customers who need it, that you have a flexible set of reports to track status, and that all work flows through the designated approval processes. We work with tools which are based on the International Standard for Quality Management (ISO 9000:2000). We can show you how this can be useful in the program/project management of your business. At LAN Systems, Inc., we can provide resources that serve as an extension to your staff and who will support the needs of your organization in the areas of:

- Project management consulting
- Project office establishment and support
- Project management technology integration
- Project portfolio management
- Project management best practices, continuous improvement

STRATEGIC MANAGEMENT

When it comes to locating and recruiting top talent in the information technology sector, there's no better partner than LAN Systems, Inc. With many years experience in IT staffing, LAN Systems, Inc. provides highly skilled individuals to implement virtually any IT project.

LAN Systems, Inc. developed a comprehensive 8-Step quality process to bring you the best and brightest IT staff. This includes:

1. **Staffing Request:** Your Firm contacts LAN Systems, Inc. and we qualifies the position – to ensure the job description is complete and accurate.
2. **Application Processing:** LAN Systems, Inc.'s end-to-end, Web-based recruitment and tracking system accepts online and emailed applications.
3. **Screening Call/Skills Assessment:** If an applicant is found suitable for a particular position, LAN Systems, Inc. will conduct the technical screening.
4. **Background Check:** The PM then performs a background check on your behalf that includes reference calls.
5. **Application Submittal:** Once these checks are confirmed, the PM locks in a contractual rate of pay and only then presents a formal job application to you, the client.
6. **Onsite Interview:** If you wish to interview a particular candidate, we will schedule a meeting time for you and deliver the candidate to you at the appointed time.
7. **Offer:** If you are interested in hiring, we will present an offer to the candidate at the previously fixed rate and handle the paperwork. Our service guarantee stipulates that you may request replacement of your consultant for any reason during the first 2 contract weeks.
8. **Ongoing Services:** We provide comprehensive benefits, as well as a full suite of immigration services and relocation resources, completely offloading HR support for the consultant.
