# APPLETON STAINLESS Incorporated

Appleton Stainless, Inc. opened its doors in April of 1999. Starting in a small warehouse in central Appleton, ASI has grown to its current facility in Appleton's NorthEast Industrial Park. We offer our customer many specialty fittings, such as 45° laterals, reducing tees, custom reducers and many other unique or difficult to find piping products, fabrication, and custom machining, with a heavy focus on fast turnaround. We work with our customers to find the solution that best fits the circumstance, be it air freight, expedited delivery, special packaging, or other needs.

At Appleton Stainless, you will find a company that is small enough to be nimble - adjusting shop schedules to adhere to the most demanding of customers' lead-time requirements.

## PS...

If you wanted your material yesterday we're almost fast enough to meet, that requirement.

## Making it happen on (your) schedule
