

There are 5 Lists from which to create 5 distinct graphics. You can begin with just one list (pick one of the more complex ones) to be sure you've got all the elements I've asked for correct, but in the end the winning entry will produce five distinct graphics of all five lists. Secondary countries (to be boxed with the original country above them, as the beginning and end of the box) are indented (see list C for example, though it is not exactly right even so).

List 1:

- * The Pitcairn Islands
- * Isle of Man

List A (use as a baseline for your work, the winning entry will
at the very least correct the error noted below)

This list has an error in it. The soft line should begin at the
“C” in Czechoslovakia, down and around Slovakia and the
Czeck Republic, and end at the mid-point of the “A” at the
end of the word Czechoslovakia.

List B (use this as a baseline to begin your work, and ok to leave as is)

All the examples use only vertical or horizontal. A winning design would probably be a bit more creative.

The background of all of these eight graphics must be either removable in Illustrator, or be white or transparent.

List C (use as a baseline for your work, the winning entry will at the very least correct the error noted below)

The box on this list also has errors. The box should turn in and meet the mid-point of the “Y” at the beginning of the word “Yugoslavia” and should go around the other countries (see below) entirely, then turning in and ending at the midpoint of the “A” at the end of the word. Also, Bosna should be Bosnia, and the two countries on that line should be inside the box with distinct fonts for each country (“Boznia and Herzegovinia” are one country), plus no “ , and” between “Boznia and Herzegovinia” and “Macedonia”.

List 3. *This is a LARGE list of 37 countries, see list C above as an example.*
