LOGO - FULL COLOR

Full color versions of your logo are included in various sizes. These files have a transparent background and are suitable for use in websites, word processing documents, emails. etc. Also included are versions of this logo with a plain black or white background. These are often smaller file sizes and may be used instead of the transparent background ones when file size and download speed are a concern.

Fully Justified: Full color version on white

Right Aligned: Full color version on white

LOGO - GRAYSCALE

These versions of your logo may be useful for newspaper ads or in the Yellow Pages, or on any black and white laser-printed materials.

Fully Justified: grayscale version on white

Right Aligned: grayscale version on white

LOGO - BLACK AND WHITE

This version is often used on faxes or any materials you reproduce using a copier. Its also the version that you should send out if you want your logo engraved on something.

Fully Justified: black on white

Right Aligned: black on white

File types included in this logo package:

AI: Adobe Illustrator - This is the file that was used to create your logo and will be needed to make future changes to it. Commercial printers will usually request this file for printing signs, posters, etc.

PDF: This is a vector file which can be imported into all major design programs and is sometimes the file type requested from flyer, business card printing companies.

EPS: This is an industry standard, meaning "Encapsulated PostScript". It can be imported into all major design programs, and is also often the file of choice for printing companies.

PNG: These are useful from home printing or use online and don't require any special program to open.
