

## WHAT'S WHAT...

**2D** is the traditional black and white photo— you know, the one that you want to get emotional about, but you don't know what you're looking at.

**3D** is an image of the fetus and it's features. So you can see the baby has dad's nose, and mom's lips.

**4D** is 3D, but with motion. You can see the baby yawn, move it's arm, or even give you a smile.

**HD** is also 3D, but better. Now you can see a rendering of the baby's skin making it the most realistic fetal image possible..we are one of the few in Los Angeles that have the newest HD capable machines

Bun + Oven is a mobile 3D ultrasound company servicing Los Angeles, and surrounding areas. We take great pride in being one of LA's first mobile Ultrasound companies and for being an all female business!

Our mission is to provide an unforgettable experience for expectant mothers in the comfort of their home!
