

# 4 SECOND VINYL

**GIMME5 EVO**  Unlocks New Possibilities

Our Gimme5 heat transfer vinyl presses at 285°F and can transfer in just 4 seconds. This unlocks new possibilities you never thought were possible with vinyl before.

**285°F**

Being able to press at such a low temperature allows you to apply vinyl to delicate garments while respecting the fabric.

**4 Seconds**

Having such a quick application time helps you get done with your projects faster than ever.

**Over 100 Washes**

A quality product that withstands anything you throw at it. Tested and proven by us.

## No More Cover Sheets!

See why the Gimme5 and all of our other product lines are changing the way you use vinyl. Order a yard today to see for yourself!
