5 Year Cost	\$10,339	\$17,975	\$29,030

NOTE 1: Sensors assumed to fail once each in a 5 year period

NOTE 2: Prices based on published MSRP and extended warranties.

I can't boast enough about these sensors. Side-by-side next to my DEXIS sensors the quality of imaging is virtually indistinguishable. I'm a big believer that "you get what you pay for" when you look for cheaper technology, but this isn't true with these sensors. You get WAY more than you pay for. The quality of imaging and the excellent customer service has made me a raving fan.
Nelson C. Kanning, DDS

We ordered a single Jazz sensor 6 months ago and have been very pleased with it. Because our staff prefers the Jazz over our other Kodak sensors, I decided to order 4 more Jazz sensors. We considered the Dexis brand, but at 4 times the price, it's cost prohibitive. We highly recommend using Jazz.
Dr. Shane Roane

Jazz imaging and the Jazz sensor have been a dream to work with - use it in both of my offices. Not only are the images crisp and clear, the price is absolutely unbeatable! The team is also very helpful and everyone we have spoken to has been nothing but gracious and helpful. Highly recommended. I would gladly purchase additional sensors in the future!
