

Enclosed are some other examples of some clever emblems that have been used for other logo designs.. They don't have anything to do with my industry but I thought they were abstract in thinking and very creative

This represents their name and that they are a hub to their industry

Super clever 😊 for a travel company

This is a ticketing company that does events- I think its very creative way to describe their company

Cool how they made a symbol out of the initials of the name and added a dash of color (blue) in the middle

Interesting how they took simple shapes and made them into something that represents a green (leaf) so it represents the companies name

This might be cool as an E and then check mark as a V?
