

Bio-K20

Product Information

ENZYME BASED PET URINE ODOUR & STAIN REMOVER (Super Strength Concentrate)

Bio-K20 is one of the most powerful and effective products on the market for the complete eradication of dog, cat and pet urine odours and stains in carpets and fabrics. Especially useful in combating the problems associated with territory marking from puppies & kittens where conventional cleaning products are totally ineffective. Bio-K20 is the scientific answer to the problems associated with all pet urine smells and stains. Can be used safely on carpets, most fabrics and even hard surfaces such as wooden flooring where it works deep in the veins of the wood to completely eradicate all odours and stains. Highly effective in dealing with dog, cat and most forms of pet urine and faeces contamination. Bio-K20 is a super strength biological formulation containing a complex blend of enzymes and bacteria designed to attack bacterial waste and urine and remove it by digestive action, converting the waste, the main breeding ground for harmful bacteria, smells, etc; into simple sugars, non-harmful gases and water. The enzymes in Bio-K20 actually digest the urine, uric acid and stains within the fibres of your carpet and fabrics and continue to be active until all of the contamination has been completely and effectively removed.

**Ecologically and Environmentally friendly
Biodegradable, safe under CHIP/COSHH**
