

## OMES

Optimizing Safety, Maximizing Comfort

- Use any of the two colours in the logo to create the packaging design
- Place logo either top right or left or bottom right or left on packaging: I like left top best on front.
- Adorning instructions can be front or back. Can be done in a simple illustration and not necessarily photographs.
- Layout can be horizontal or verticle but prefer verticle.  
Dimensions for layout (See attached examples)  
The film width is 350 mm
- You can leave a transparent see through window on the front of the bag to be able to see the product (masks)
- Bag width can range from 130 - 210 mm
- Bag 105
