

## Information for brochure

All of our units are made in the USA using only the highest quality materials in both the construction of the tanks, and in the filtering media.

All of our units hook up to the main water supply, filtering and conditioning the water before it enters the home.

Get spring quality, Alkaline water at every tap in your home for 1000's less than the competition.

The list of benefits on our systems are extensive, and could never fit on a single brochure, but here are a few highlights.

Whole home filter units.

Provide the whole home with spring quality alkaline water at every tap.

Remove virtually all heavy metals and Volatile Organic Compounds (VOC's)

Lasts up to 15 years maintenance free.

Doesn't strip the water of all the beneficial minerals like reverse osmosis systems.

Raises natural alkalinity by removing harmful contaminants, like acids, chlorine and chloramines.

No more buying bottled water. Drink from your tap, Bathe in it, wash your clothes with it, and give it to your pets!

Made with KDF55 and Centaur High Catalytic Carbon, the highest grade of carbon on earth.

Water Conditioners/Salt free water softeners

Breaks down all the bad dissolved solids into harmless nano particles, that slide through your plumbing without forming deposits or scale buildup.

Removes existing scale buildup in your pipes and water heater, extending the life of both.

Are built with Enpress tanks and their patented vortech system, and utilize the newest, cutting edge technology, Filtersorb SP3.

Can be used installed with a whole home filter unit.

The Filtersorb SP3 media lasts 3-5 years, or even longer when paired with the whole home unit.

No monthly salt costs or harmful byproducts. Water is 100% drinkable unlike salt based systems.

Salt free way to soften water without raising TDS, adjusting the ph levels, or stripping your water of all beneficial minerals.

Save money on soap, shampoo, and laundry detergent.

#### Other Idea

Visit [EWG.org/tapwater](http://EWG.org/tapwater) to see whats in your citys water supply. Simply enter your zip code, pick your water company and the results are instant.

**\*\*Prices include plumbing installation, with copper, not cheap PVC. Price based on the unit being no more than 5ft. from the main. Whole home Filters also require electricity ran to them.**
