

## Company Profile

Velocity Group is a partnership between Velocity Geomatics Inc, in operation since July 2013, and the recently formed Velocity Engineering Inc. Velocity Geomatics experienced steady growth throughout Alberta since opening for business. The addition of Velocity Engineering in January 2016 and led by two senior civil engineers with extensive experience in the Peace Region, makes Velocity Group uniquely positioned to offer fully integrated, professional surveying and civil engineering solutions, creating cost effective, innovative outcomes for our clients.

At Velocity Group Surveying & Engineering, we cultivate a culture that guarantees the best outcomes for your projects every time. This culture starts with a passionate desire to be in partnership with our customers, our colleagues and our communities across Alberta. We aim to offer solutions for any surveying or civil engineering task or project.

We offer a broad scope of Surveying and Civil Engineering services from our offices across Alberta. From the Peace Country to the Southern Foothills and all points in between we offer services to nearly all sectors of industry.

We work with our clients in consultation and partnership on every project to truly understand your technical needs and expectations (and your budget). Creating successful outcomes with our customers is a fundamental part of our business philosophy and a very rewarding aspect of our work.

Our professional and technical staff treats every task, from traditional to 'never been done before', with best practices *and* mindset of seeking constant innovation. This means we can use our innovative technology, integrated services and tested processes to deliver exceptional results, beyond your expectations, every time.

Velocity Group has been awarded a Certificate of Recognition (COR) for our safety program. We are devoted to safe work practices and environments for all employees, contractors, subcontractors, clients and the communities where we conduct our business. The well-being of the environment is elemental in our philosophy.
