

New Sign-Up Flow

1. Users will be able to sign-up using their phone number and 1-time password (OTP).
2. Users will be able to sign-in using their Google account, Facebook account, or Apple account, **LinkedIn account (missing below)**, “Continue with email” option

See AirBnB example:

A screenshot of the Airbnb mobile app's sign-up screen. At the top, there's a close button (X) and the title "Sign up". Below this, there's a form with a "Country/Region" dropdown menu set to "United States (+1)" and a "Phone number" input field. A small note states: "We'll call or text you to confirm your number. Standard message and data rates apply." Below the form is a large red "Continue" button. Underneath the button is a horizontal line with the word "or" in the center. Below this line are four buttons for social login: "Continue with email" (with an envelope icon), "Continue with Facebook" (with the Facebook logo), "Continue with Google" (with the Google logo), and "Continue with Apple" (with the Apple logo). At the bottom, there's a link that says "Already have an account? Log in".

3. Users will be able to add different information about them:
 - **Schools I've Attended**
 - They can integrate with LinkedIn which will autofill the schools they've attended
 - They can input their school names through a form field
 - **Places I've Lived**
 - From LinkedIn integration (cities where their jobs and colleges were located)
 - They can input their places lived through a form field (city, state)
 - Dropdown will be auto-populated for easy selection
 - The form field will be a field in which you can enter multiple entries (validation must come from Google Maps API)

- **Places I've Worked At**
 - From LinkedIn integration - we can pull which companies they worked at
 - They can input their companies they have worked for in a form field
 - The form field will be a field in which you can enter multiple entries (validation must come from LinkedIn API)
- **People I Know**
 - Auto-pull CONNECTIONS from LinkedIn API
 - Auto-pull FRIENDS from Facebook API
 - No option for user to manually add any friends/connections
- **Events I've Attended**
 - Auto-pull events attended from Facebook
 - Eventbrite integration?
- **Events I'm Planning to Attend**
 - Auto-pull events that I am going to attend from Facebook (including Maybe's)
 - Eventbrite integration?
- **Music I Like**
 - Spotify integration
 - Ability to auto-add artists & songs through fields
- **Sports Teams I'm a Fan Of**
 - Choose sport
 - Choose league
 - Choose city & official team name
