About us

The Accushield sign in, health-screening, and forehead scanning kiosk can help prevent and/or stop the spread of COVID-19 by giving facilities a streamlined way to validate that every staff member, visitor, third-party caregiver, and vendor has completed the required daily screening protocol before entering. Because the Accushield system tracks which resident the visitor, third-party caregiver, and vendor sees during the visit, this can assist in reducing the spread of the virus should one of these visitors and/or residents contract COVID-19.

Daily screening checks include:

- ✓ Touchless forehead temperature scan
- ✓ COVID-19 screening questionnaire
- ✓ Required PPE acknowledgment form

Facility infection control improvements:

- ✓ Helps keep out individuals that show symptoms of COVID-19.
- ✓ Helps with mass visitor, staff, third-party caregiver, and vendor communication should there be a COVID-19 outbreak.
- ✓ Helps mitigate the spread of COVID-19 by tracking visitor and resident visit interaction.
- ✓ Helps with COVID-19 messaging (example: the person must agree to wash hands and wear a mask before completing the sign-in process and entering the facility).

ACCUSHIELD

INTEGRATED. TOUCHLESS. THERMOMETER.

Accushield Kiosk + Touchless Thermometer

The Accushield kiosk replaces the paper sign-in logs at entrances to Senior Living Communities and gives operators the ability to sign-in, record body temperature, and ask CDC-recommended COVID-19 screening questions for every staff member, visitor and third-party caregiver who enters the community.

Touchless Integrated Thermometer

The Accushield Integrated Touchless Thermometer instantly detects the body temperature of the person signing in and automatically passes the measurement to the kiosk during the sign-in process.

ADDITIONAL FEATURES

- ✓ Able to capture temperature within 29 in
- ✓ Temperature accuracy $\pm 0.5^{\circ}\text{C}$
- ✓ Temperature recorded in 0.2 seconds
- ✓ Audible alarm can be utilized
- ✓ Medical grade class 2a Device - Pending
- ✓ Temperature Range - 34°C - 43°C
*Validation & Certificate Pending

Touchless sign in with AccushieldConnect mobile app

With health safety in mind, Accushield has prioritized the development of an all-in-one touchless sign-in and health-screening solution designed to capture temperature, ask COVID-19 questions and even validate a negative COVID-19 test result for staff members, visitors, and third-party caregivers who enter senior living communities and nursing homes.

VISITOR EXPERIENCE SURVEYS

Receive valuable visitor experience feedback immediately upon sign out. Simple visit surveys can help improve visitor satisfaction and identify visitor issues that need resolution in real-time by onsite staff. Improve community online rankings by automatically requesting social reviews as visitors sign out of the community.

All-in-One Solution

Instantly print name badges

Instantly print name badges Print custom name badges for every visitor who enters your community. The badge printing option provides increased awareness of who is in your community, and in turn, creates a safer environment to live and work.

Visitor reporting and analytics

The Accushield visitor sign-in system allows communities to track, analyze, and create reports based on the care delivered to residents by outside agencies and self-employed private care providers.

All-in-One Solution

Visitor photos

The Accushield visitor sign-in system uses the built in tablet camera to capture visitor photos. Management can quickly access these photos via the Community Dashboard.

Text or email notifications

The Accushield sign-in system can send a text message or email when visitors sign in to meet with a community staff member. COMMUNITY WATCHLIST: A text or email can be sent if a person that is banned from the community signs-in.

Community tour tracker

Capture, Track, and Record every community tour following a prospective resident's sign-in on the Accushield tablet. Designated community staff (ex. Sales and Marketing) can be notified via text or email automatically when a walk-in tour visits the community.

All-in-One Solution

Evacuation management

IN AN EMERGENCY, TIME IS EVERYTHING AND SO IS THE ABILITY TO KNOW WHO'S IN YOUR COMMUNITY. Community managers can quickly access an online ledger of the visitors in the community and the residents that are away.

Love Meter

The Accushield visitor sign-in system tracks the least visited residents in your community. This simple data point allows your community to better manage and love the residents that may feel abandoned and isolated due to a lack of outside visitation.

Community watchlist

The Accushield visitor sign in system can instantly notify senior living community management and the front desk concierge if a visitor that is not allowed on campus signs-in.
