

Bringing Visual Experiences To Life

WHO ARE WE?

CUBE is a division of AV Media Systems, one of Australia's largest long-established audio visual systems integrators specialising in premium market-leading solutions for Corporate, Government, Retail, Education and Recreation throughout Australia. We employ a dedicated team of technical sales engineers, installation technicians and after-sales support experts to ensure your audio visual project is state-of-the-art, designed, managed and installed professionally and then supported well into the future.

WHY CUBE?

Unlike traditional LED TV's that are limited in physical size, CUBE LED video walls can be designed to suit any size requirement without the joins and physical bezels between LED panel, resulting in a join-free, seamless high definition image for both indoor and outdoor use, including flat, curved and even transparent video walls. Our CUBE engineering and manufacturing process makes design, installation and maintenance inexpensive, offering you a lower cost of ownership, high performance, reliability and scalability. CUBE LED video walls are optimised for a wide variety of applications and environments with features including front-serviceability, adjustable brightness, flexible displays, stunning colours and fine-pitch resolutions.

CHALLENGE US

Our engineering designs are initiated by our clients. We love it when our clients present us with a unique and challenging requirement and our CUBE engineering team are always inspired by new opportunities to excel. After an initial site visit, we go back to our design team and develop a solution from the ground up that is specifically tailored to the unique application. This is the reason we have become a leading manufacturer, designer, installer and integrator of LED video wall technology in Australia. Any size, any shape, any angle. We welcome the opportunity to bring your imagination to life with CUBE.

CREATIVE CUBE

Each project we have done has been custom designed and unique. Our Creative range of CUBE displays are just that, CREATIVE. Ring displays, Hexagonal displays, portrait screens, spherical displays and any other shape you can think of, we make possible.

TRANSPARENT CUBE

The Transparent CUBE display is designed to give you that "WOW" architectural effect. It is designed so that you can see through the screen from both sides, (high transparency) when the image is not displayed. It is ideal for any retail, hotel, shopping mall or other commercial applications.

FLEXIBLE CUBE

Our Flexible CUBE innovation is just another reason why CUBE is leading our industry in LED Video Wall technology. Its light-weight and ability to curve makes it perfect for those installations that call for a non-traditional LED solution. Flexible CUBE allows for seamless convex or concave LED designs where your traditional flat panels will not work.

FINE PIXEL CUBE

The Fine Pixel CUBE displays have incredible resolution enabling your audience to sit/stand very close to the display without losing any fine definition in your image. It's display have ultra-clear image quality and our "Soft Light" technology. Soft light technology is only available in CUBE. The picture is stable without ripples and no black screen, which eliminates the smearing and blurring effect you normally get during fast image motion.

PROJECT PROCESS

Our Process begins with your vision. When it comes to creating a one-of-a-kind design for your space, our CUBE LED technology offers industry leading technology and solutions to transform your basic space into an amazing digital world.
