

Trafluid Logo

Some More Information

Trafluid has some already defined design guidelines of which the essence has been reported below. They are not strict rules but we try to follow them as close as possible for the sake of uniformity.

Fonts

- Titles are typesets in MADE Evolve Sans EVO.
- Normal text is typeset in Roboto Slab.
- For monospaced fonts, we use Source Code Pro.

The first font is copyrighted and we have a full licence for its use. The font files are attached to this document. The other two fonts are open fonts which can be used without having to worry about copyrights (also included along this document).

Colors

Primary (Emerald)

- Hex: #13ef80
- RGB: rgb(19, 239, 128)
