

Pre-Spray and Dry Compound Cleaning

Carpets Have Never Looked So Clean!

Step 1

All compounds require some degree of moisture to do their job. It is said that up to 90% of all carpet dirt and soil can be removed with a pre-sweep/clean. The use of the two products is the perfect combination for any carpet cleaning, not just for appearance, but also for health and comfort. **Bonanza pre-spray** is used to prepare the carpet for the cleaning compound to be applied.

Step 2

Step 3

The **Bonanza pre-spray** is allowed to set for 60 seconds. after having set, the cleaning compound is applied. The compound is then agitated by the counter rotating brush machine. Depending on the soil of the carpet, this causes the compound to turn from yellow to black as it absorbs the remaining dirt and soil from the carpet. The compound will be collected by our cleaning machine with its "No Vac Technology" during the post-cleaning.

The compound meets the EPA/DfE standards/guidelines, is 98% organic, green, environmentally friendly, biodegradable and leaves a fresh, pleasant scent.

Advantages Include:

- ✓ **Removes pollutants**
- ✓ **Low moisture reduces the risk of mold and bacteria growth**
- ✓ **Improves air quality drastically after first application**
- ✓ **Carpets stay cleaner for a longer period of time and look newer**

STRONG DRY Offers You:

satisfaction
