

# Assistant Results Page - Requirements

## Page Objective :

1. Clear display of the assistant search results
2. Capability in one look to view events selection vs sites selection (museum, monument...)

## Assistant results Page – Display results elements

- Assistant criteria selection : Date / Time / Location / Experience
- Site / Event card : name, Photo, rating, Site / Event location, Site / Event distance from user location, time duration before closing
- Map : display the assistant results on the map
- Weather information : based on the date, time and location

## Assistant results Page – Other elements

- Breadcrumb : My Assistant, My Favourites, iSearch (capability to find directly a site or an event)
- Login function with user photo once connected
- Logout function
- Drop down Menu to access : Account information + other function that will come later
- Language selection : français, english, español
- About us information (company, team)
- Follow us function (twitter, facebook, google+)
- Citibreak and your information (terms of use, private policy)
- Contact us
- Site map
- Website logo

## Design Expectations : 1 page

- One Assistant result page desktop version

**The mockup is just to give you some perspective regarding the elements composing the page**

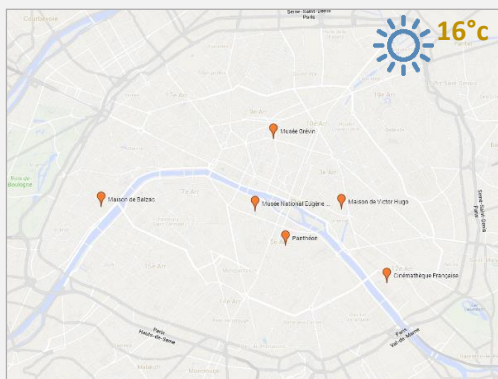

## 6 sites et 1 exhibition Match your selection
