

The best way to display your pride is by flying your colors on the Estate Telescoping Flagpole

The Estate Flagpole

The Estate Flagpole is designed for home landscaping, tailgating, RVing and business use. The patented, inter-locking sleeve system allows for quick and simple raising and lowering. The hard anodized finish is maintenance free, with all stainless steel hardware to prevent rust. This makes our telescoping flagpole maintenance free.

Landscaping

Do you like to change your landscaping? Do you have a winter and summer home? The Estate Telescoping Flagpole is easy to move. All you need is an extra ground sleeve and you can relocate your flagpole with ease. Easy 30 minute installation by concreting in a 24 inch ground sleeve.

City government, veterans, memorial gardens, youth leagues and more can display their pride as a tribute for all to see with an Avenue of Flags.

Made in U.S.A.

Why The Estate Flagpole?

The latest in flagpole technology makes it simple for homeowners and businesses to display their colors. The Estate Flagpole pioneered the telescopic flagpole industry.

It offers the simplest most durable system you will find. A major improvement is the quick and simple inter-locking sleeve system that makes flying your flag faster and easier than before.

The Estate Telescoping Flagpole uses high strength aluminum alloy 6000 series with T6 temper. We use a larger diameter base tube allowing our telescoping flagpole to be 30% stronger than the competitor's current products. The larger diameter also gives the flagpole a sleeker more tapered appearance. Our flagpoles have an architectural hard anodized finish.
