

# UdderOne™

**A totally new and unique liner for dairy farmers  
who care about health, cleanliness and quality  
at a competitive price**

- First non-absorbing liner providing total transparency
- Allows quick detection of abnormal milk
- Eliminated twisted liners
- Crafted from polymers used in medical equipment
- No carbon black, fillers or pigments to shed into the milk
- Made with zero Phthalates, which are known to cause health issues
- Allows cows to milk out fast and complete, helping reduce bacteria & disease
- Easier cleaning and sanitizing when you can see what you are doing
- Reduces change-outs by using long life materials
- Comfortable liners offer less irritation compared to silicone and nitrile liners

*Here's a liner  
shedding carbon  
black contaminates  
into the milk.  
With UdderOne™  
this can not occur*

**MAKING A CLEAR  
DIFFERENCE**
