

Header illustration for agency website

The agency provides software development services for Graphical User Interfaces. This should be made clear through this Illustration.

Questions? josefjaud@gmail.com

Business

Machine Control HMI

Tablet

Mobile

Medical

E-Home

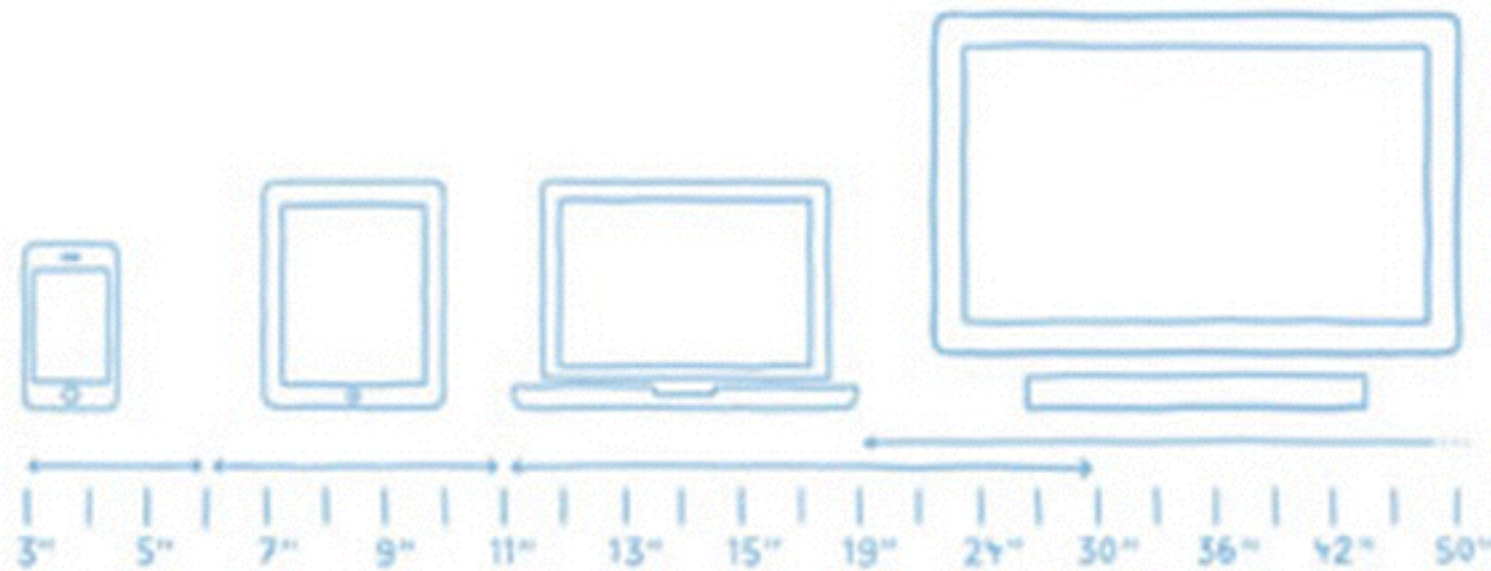

Household Appliances

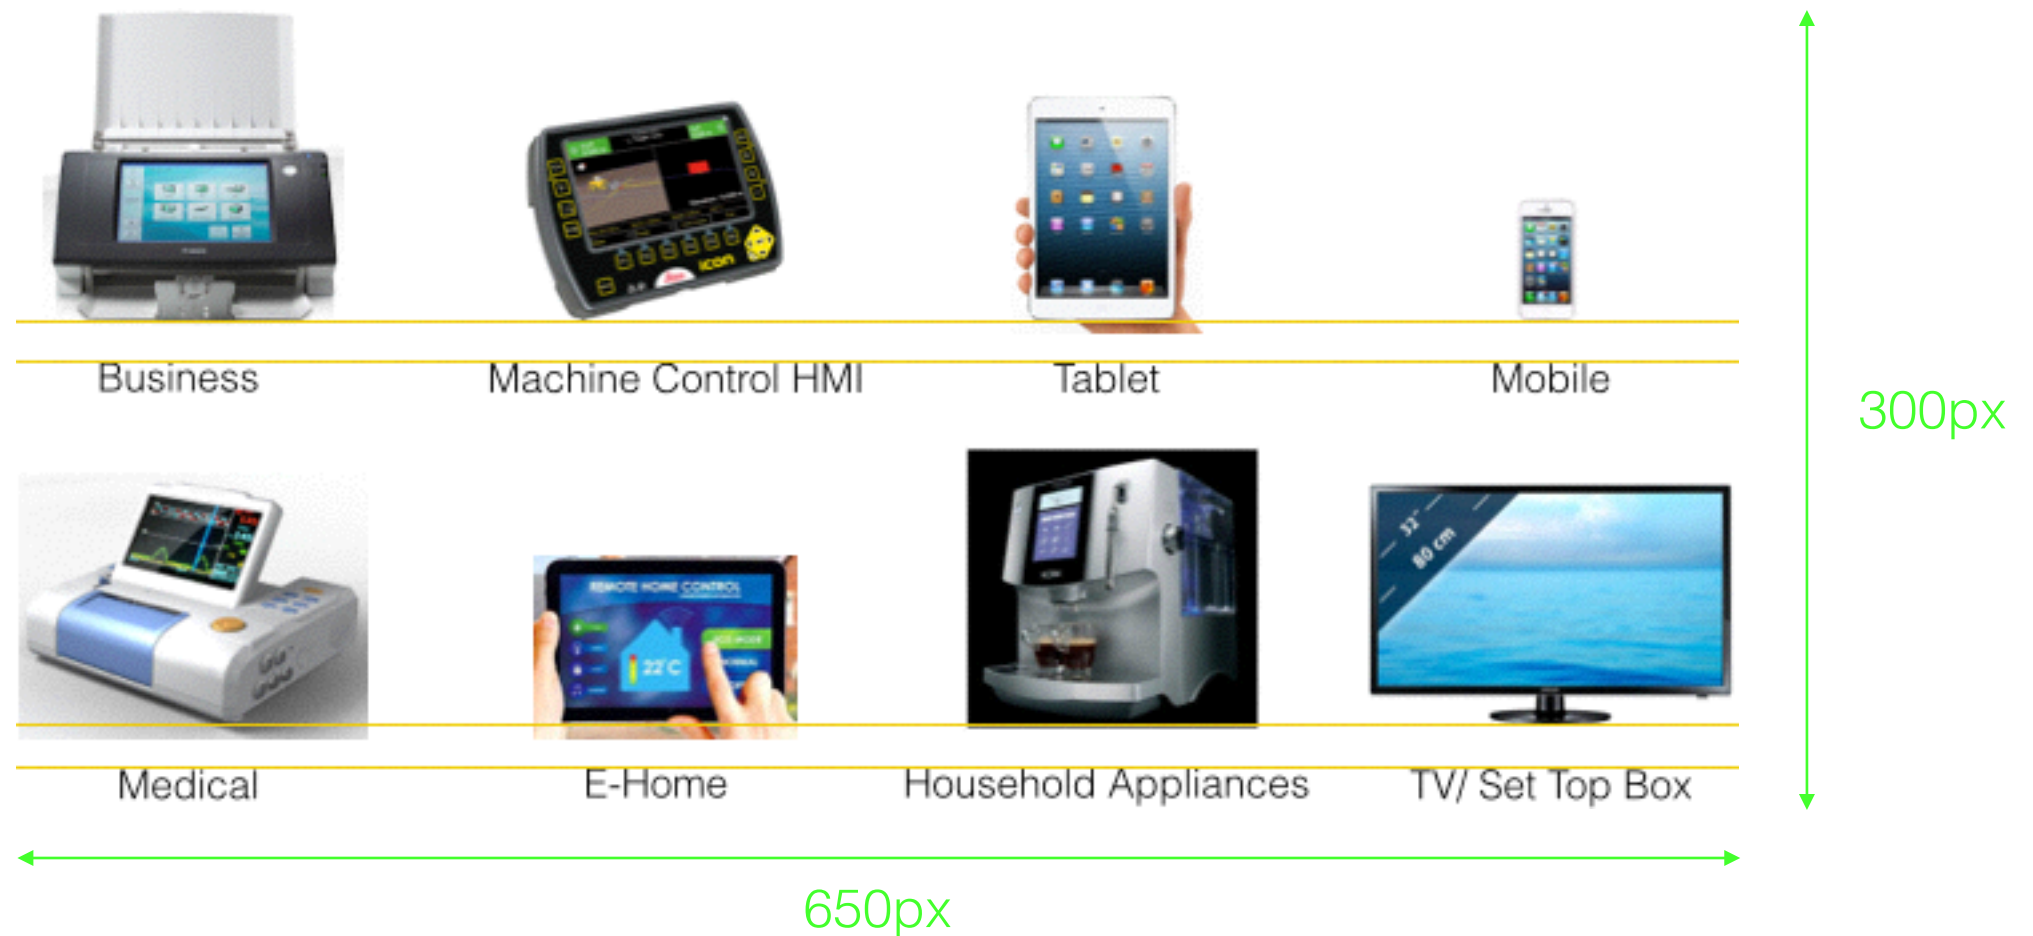

TV/ Set Top Box

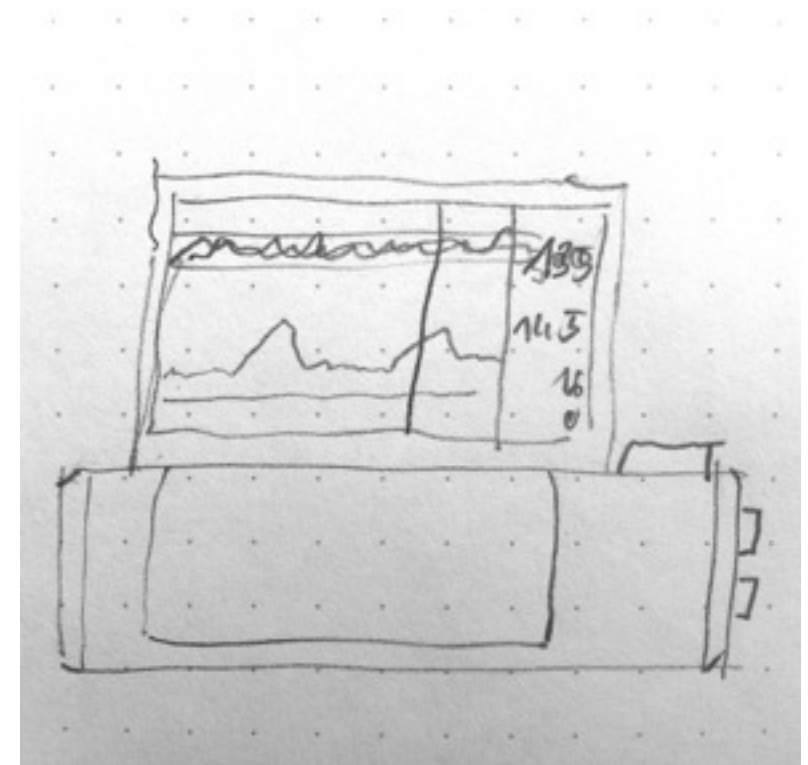

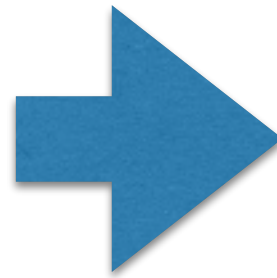

Please draw all these devices as they are shown on this Photo-draft.

The style should be a little bit like this: Linear and simplified but with straight lines (not like this hand drawn style above).

Please keep the proportions more or less like shown here. Please decide on Your own which level of details makes sense.

Please draw all devices in a frontal view.

Show parts of the UI to make clear which kind of application it is. In this case the „house“ is the most important part of the UI as it illustrates „E-Home“.

The screen is the most important part of any device!

Please provide the asset as an Adobe Illustrator File
(Vector Drawing).

Thank You very much!

In the following slides you find bigger images of the devices to make it easier for You to draw them.
