

READY, AIM, FIRE

An intra oral camera with caries detection, boasting exclusive FIRE technology helps you show your patients where hidden dangers may lurk.

FIRE technology

Fire combines reflectance and fluorescence signals for the most sensitive results

CS 1600

Containing state-of-the-art Fluorescent Imaging with Reflective Enhancement (FIRE) technology. Using fluorescence and reflectance, FIRE technology quickly and safely shows you exactly where possible incipient decay exists in fissures and on smooth surfaces.

Features:

- Patented FIRE technology
- Simple “scan and detect” workflow
- Most sensitive results
- Highest image quality
- Easy to share and integrate
