

This is an image of the first girl we used on our tour, penthouse pet/mode. We need to portray top quality girls

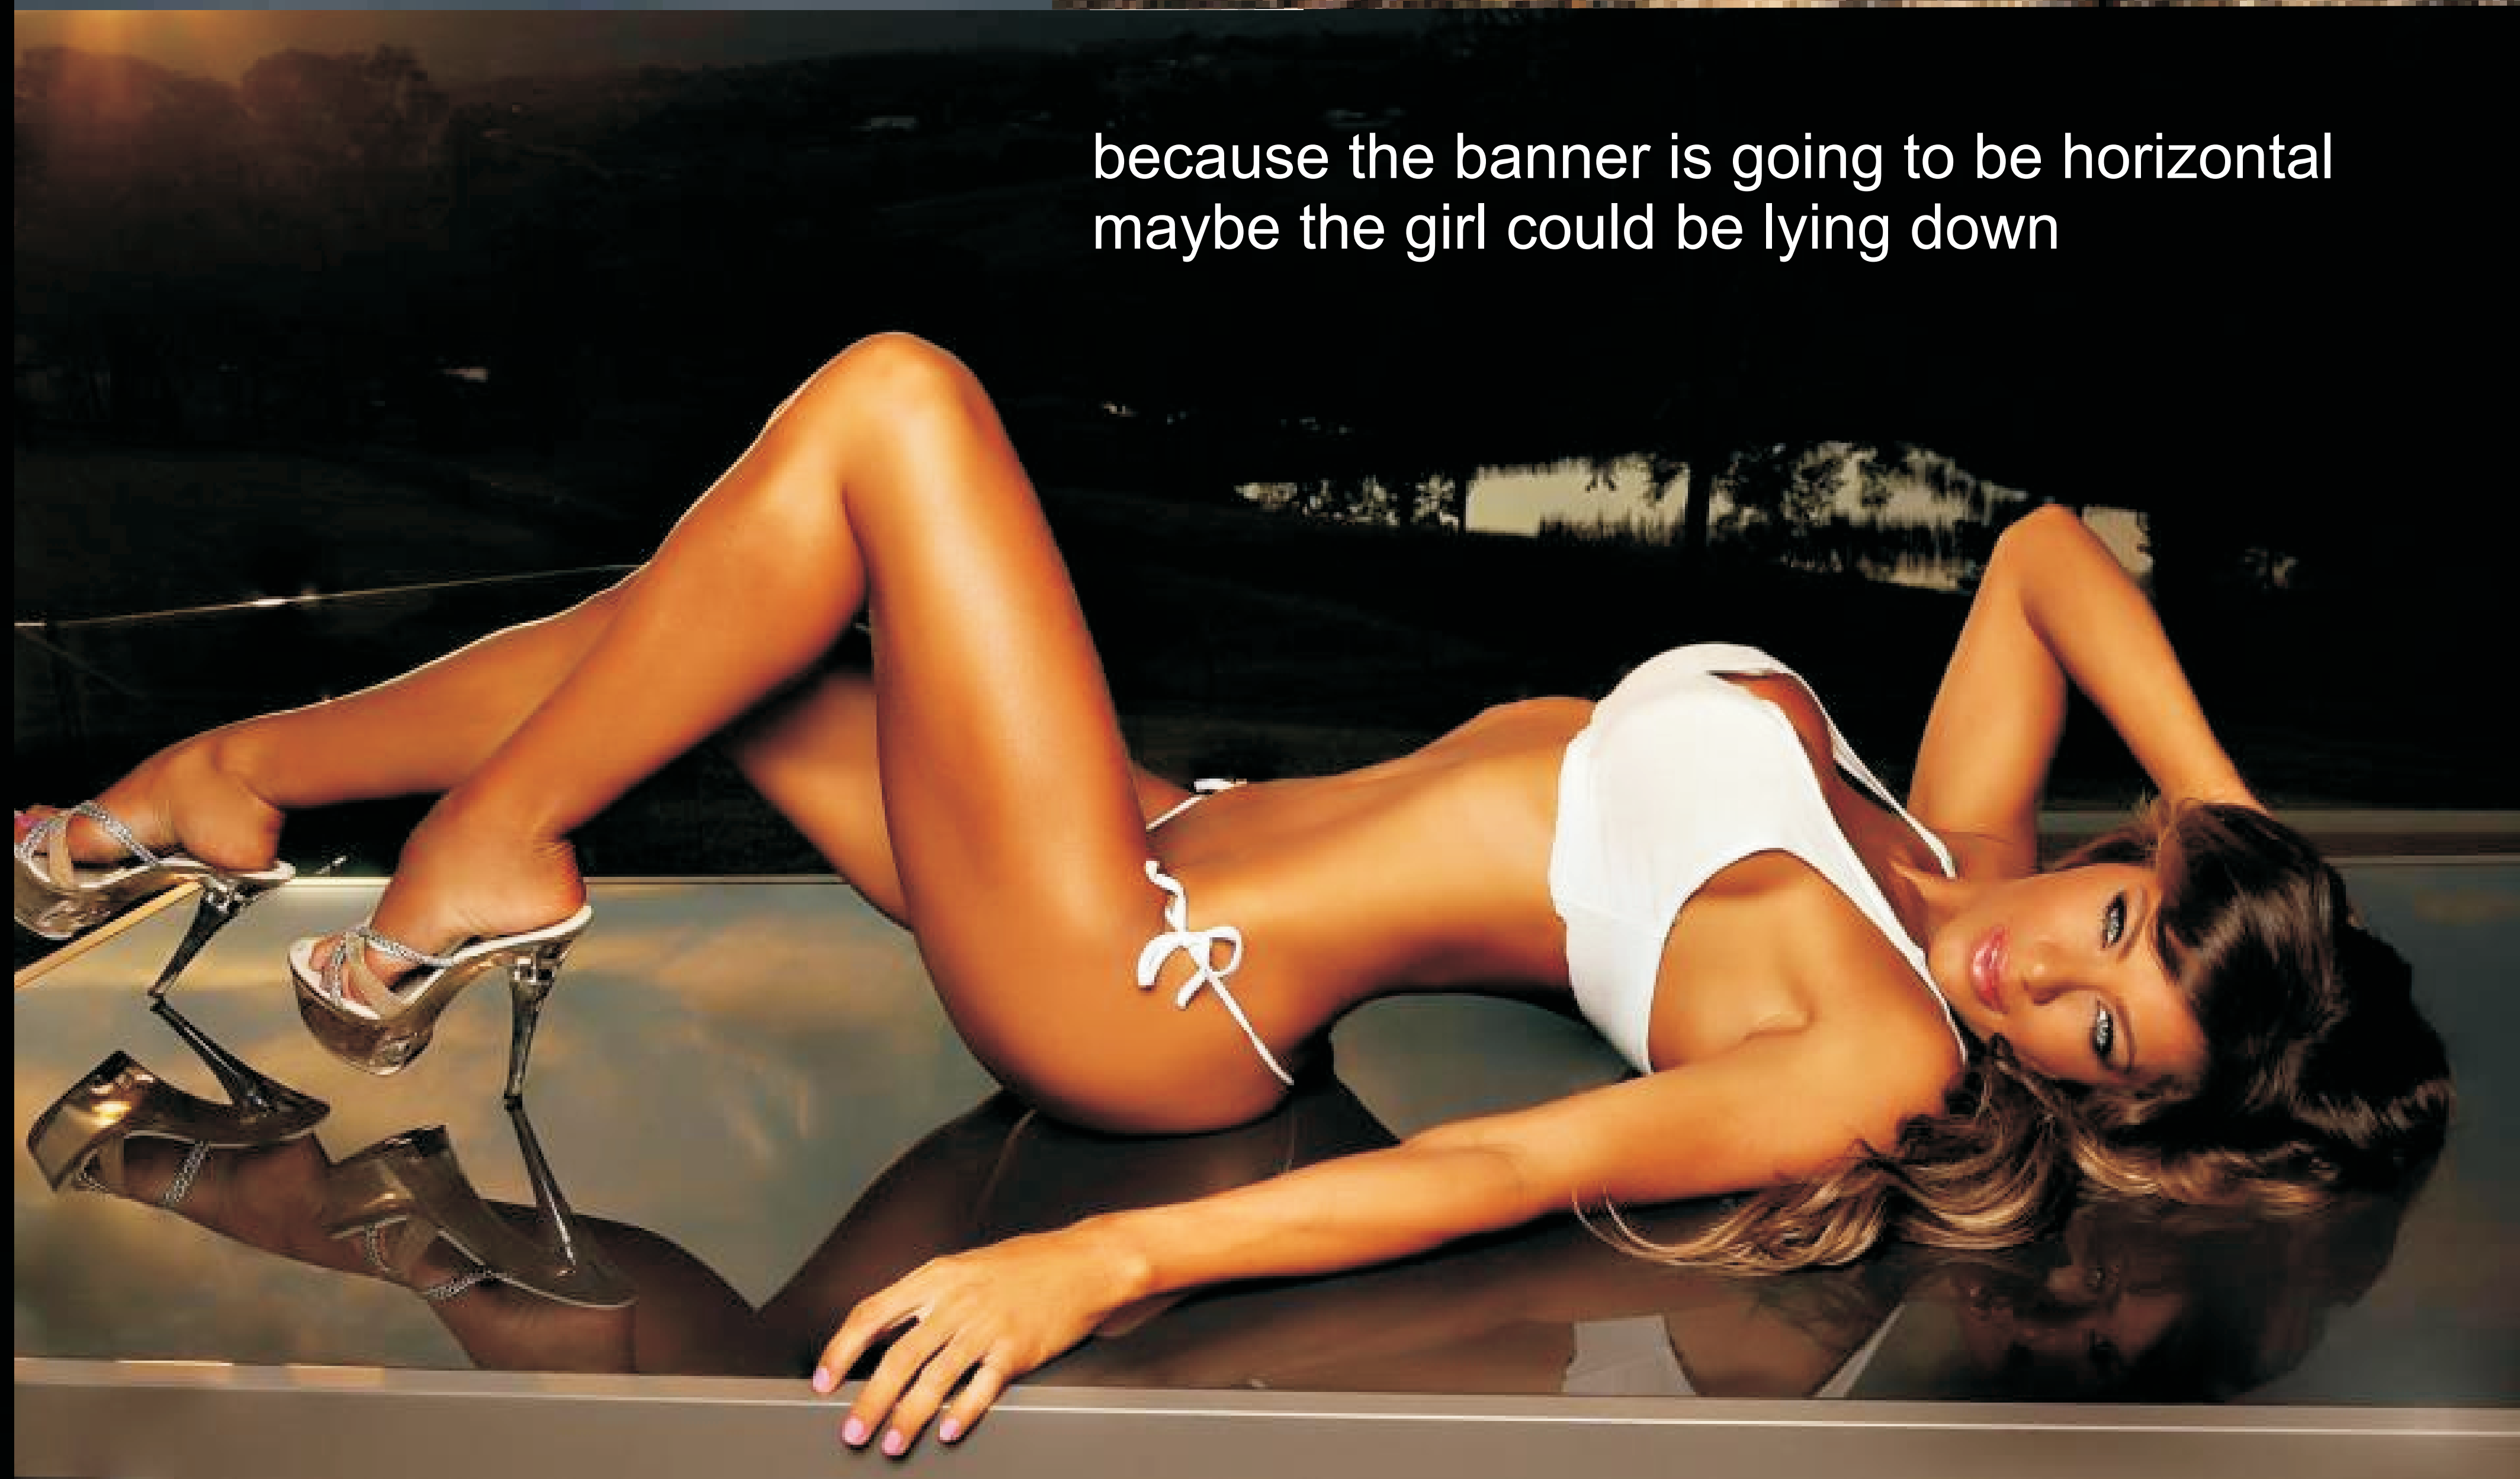

NICK
ART & PHOTOGRAPHY

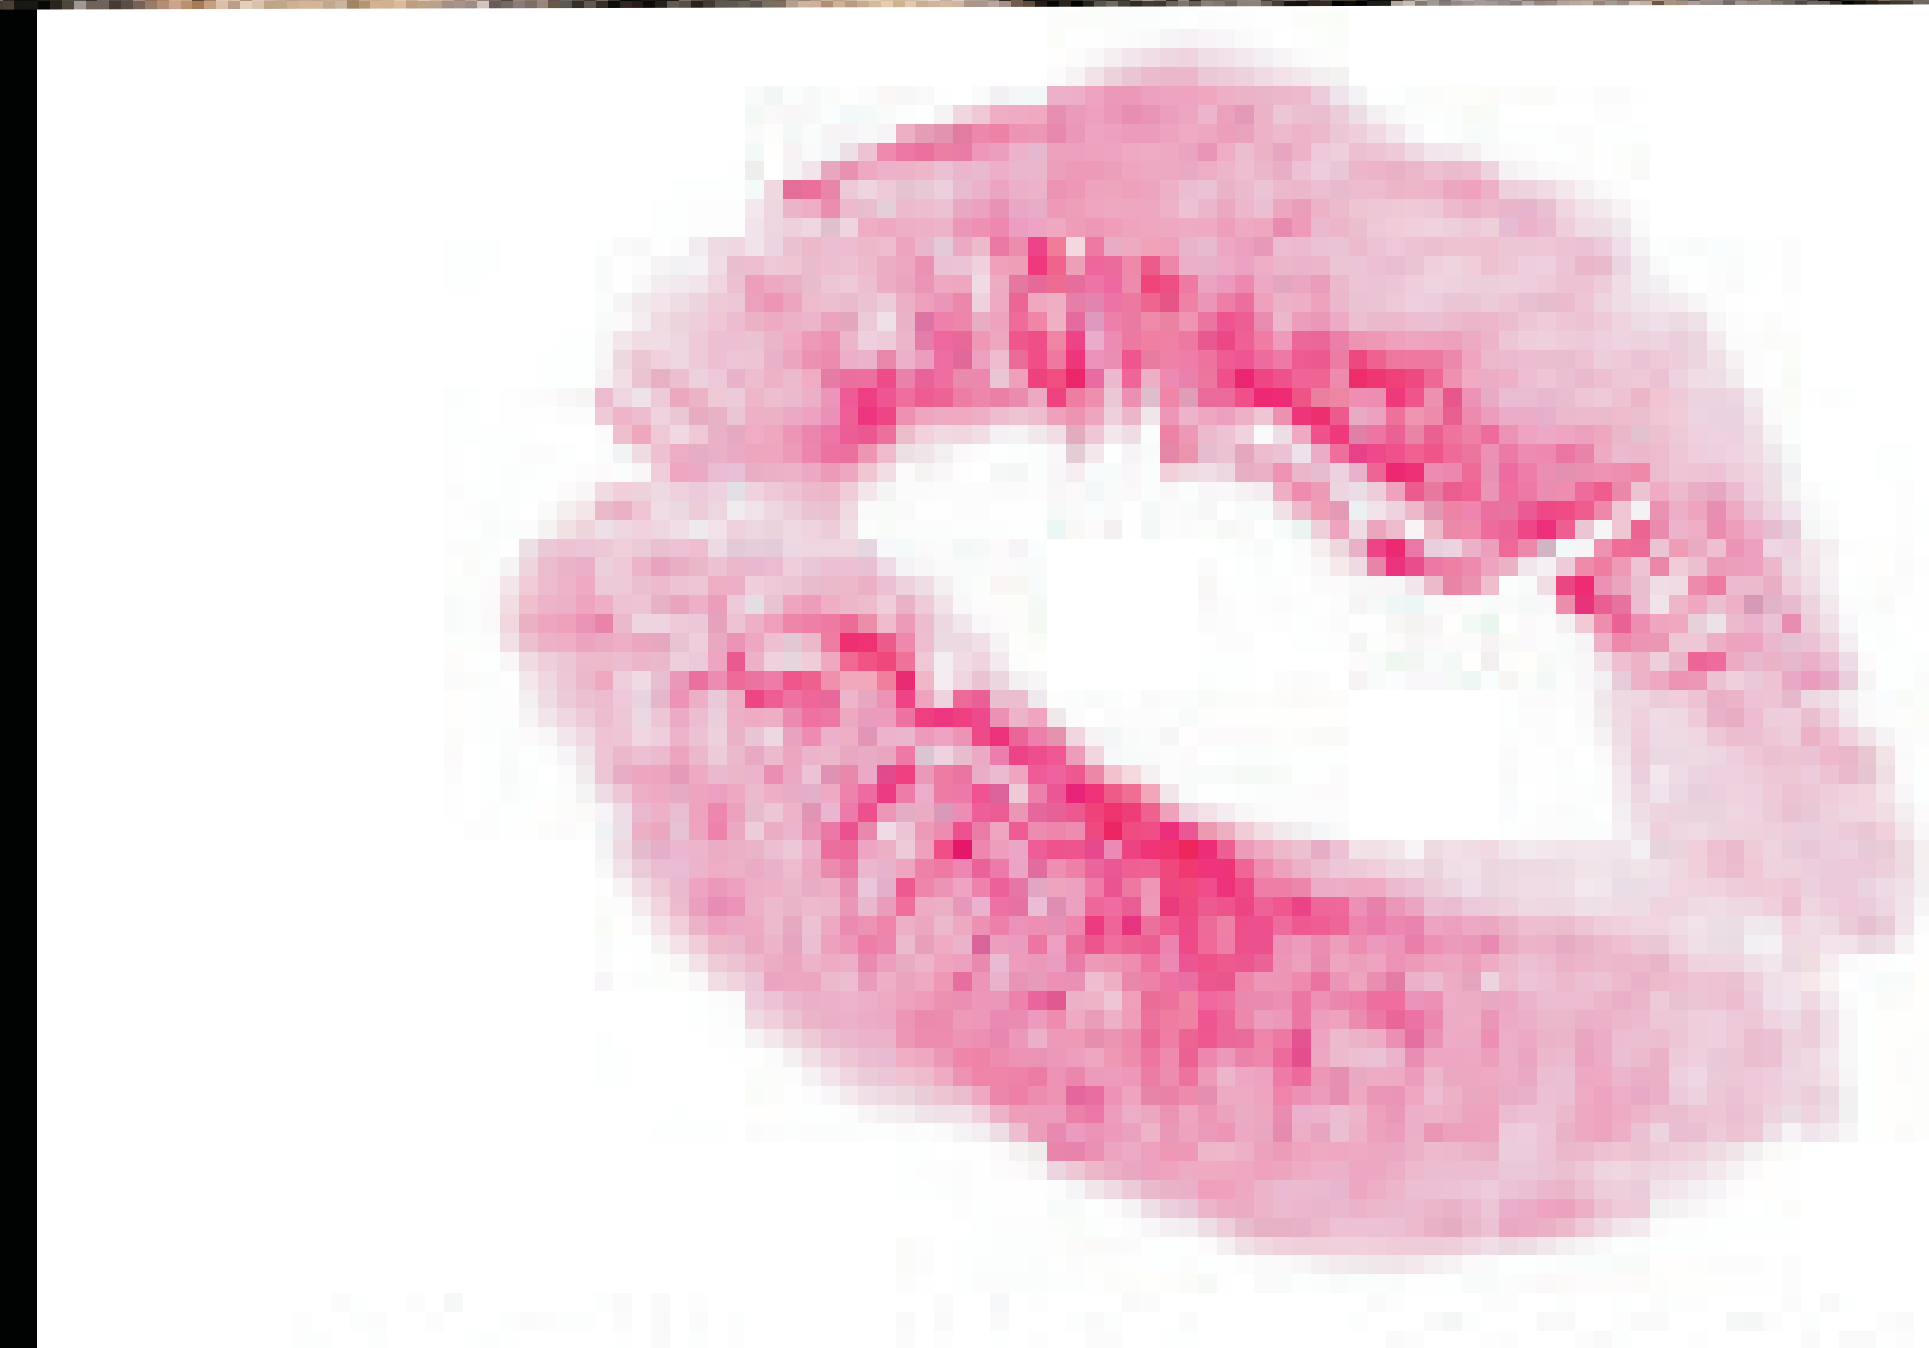

maybe in the background
eg; coal mound

Maybe black/dark background would be best as it will make images and logo pop.

because the banner is going to be horizontal
maybe the girl could be lying down

background option of horizon coal ash, however may distract from text and other images

The MoniqueJuzel part of my logo is good with black background, however I am open to changing the miners entertainment part and I want to involve pink lips in the advertisement or logo somehow.

maybe sexy girl wearing hard hat in bikini/lingerie or dirty like coal miners get after a hard days work

could have sexy girl standing on one side of banner
