

Possible applications of the icons

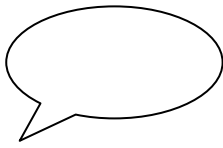

The icons within the classroom: need to be on a transparent background – no outer box or circle.

Icon info

We really just want basic icons that have a consistent size and scale that will work with in the classroom.

Speech bubble (to represent speaking)

Think bubble (to represent warm up)

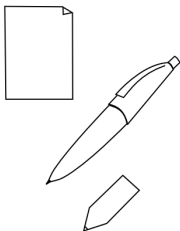

Open book (to represent reading)

Headphones (to represent listening icons should be 'over the head' not ear buds - no wires)

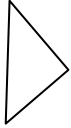

Pen or document (to represent writing)

Star (to represent language in general)

Play button (triangle or similar) (to represent watching)

Two people (just heads and body) (to represent practice)

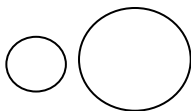

An outline or solid version of this

Icon (to represent review - see attachment)

Icon (to represent pronunciation – your idea or something like this – it represents word stress)

icon (to represent grammar - see attachment or your idea)

bit short of ideas here – if you can't come up with something just submit anyway and I will use the 'star' for language and grammar

icon (to represent a web task your idea - e.g world, pointer, 'e')

like this but not on a colour background

Thanks!
