

MAGNESIUM DEODORANT

UNIQUE SELLING POINT : MAGNESIUM FORMULA

Magnesium mineral nutrient supplements are a growing trend.

Magnesium is essential for nerve transmission, energy production, muscle relaxation, and many other life processes. Magnesium is best absorbed transdermally through the back of your knees, the soles of your feet and... **the skin of your underarms! More than an aluminium free deodorant that works, nasanta is loaded with magnesium.** A slightly alkaline magnesium deodorant formula neutralises organic acids which cause body odour.

TRULY ALUMINIUM FREE

nasanta is free from potassium aluminium sulfate (the active ingredient of the rock crystal deodorant), aluminium chlorohydrate, and aluminium chlorohydroxide.

+ FEATURES & BENEFITS

no parabens • no fragrance • no alcohol • no propellant • alkaline formula • suitable for sensitive skin • low solubility (doesn't wash away with heavy perspiration) • not tested on animals

Net volume: 80 mL

Delivery system: roll-on
