****AT&T has already adopted the Pension Protection Act (PPA) for its Managers and 2nd Qtr 2012 will have officially adopted PPA for its Non-Management. If you are considering retirement, you may want to take advantage of the current low interest rate in the 2nd quarter of 2012. This is good AT&T News in this bad economy! If you defer your retirement until later in the year, you may be surprised to see your pension value potentially reduced! This rate change is leaving some employees confused about how their retirement accounts are potentially affected.**

Call (800) 900-5867 (opt.2) to understand your options and receive the brochure "5 most common mistakes when deciding to retire".

**Rate may not apply to all AT&T employees and can change based on benefit commencement date, actual payouts will vary. Call 800-900-5867 (opt.2) for more info.*
